

► Ambulatory Blood Pressure Monitor

available for hire or purchase for your clinical trial.

Overview

These Ambulatory Blood Pressure Monitors provide fast, accurate results enabling users to fine-tune their patients treatment. Extensive testing by independent clinicians has validated their accuracy time and time again.

Their reliability has made them one of the most popular ambulatory monitors in the world. They have a compact design, are lightweight and have a quiet operation to maximise patient comfort.

The monitor has advanced reporting software that allows rapid analysis of patient information.
