

Ditabis Block Heaters and Laboratory Shakers

Labcare are pleased to announce a partnership with Ditabis, manufacturers of high quality laboratory rockers, shakers and aspiration systems.

Their heating and cooling thermal shaking products offer the end user greater flexibility than competitive instruments. There are 40 exchangeable block types for each of their 6 shaker units. The MHR, MHL and MKR models, offering double capacity, can be fitted with two different block types for ultimate experimental flexibility. Ditabis will also custom build blocks to meet customer requirements. 7 different exchangeable platforms are available for the 3D and Orbital shaker products. Precision engineering gives smooth operation and stop/start characteristics independent of selected speed.

Citizen Balances and Scales

Labcare Service Ltd have been appointed exclusive UK distributor for Citizen Scale Inc. the US based manufacturer of scales and weighing devices for precision and routine analytical applications. Their high quality precision balances read down to 0.001 gm. The analytical balance range has built-in internal calibration for consistently accurate results. They offer high specification balances that suit education, industry and research application areas. This includes top loading versions and routine measuring scales.

Labcare Service Ltd is the ideal partner for Citizen, offering first class application support plus calibration and preventative maintenance service for the balance in future years.

Kyratec Thermal Cycler

Labcare Service Ltd is the UK distributor for Kyratec, a leading Australian manufacturer of high quality thermocyclers. Kyratec offer the new Trinity Super Cycler, a triple zone, high performance thermocycler that is configured for 200ul individual or strip tube (dome or flat capped) or 96 well plates with strip caps or adhesive film seals.

At the heart of the instrument lie 3 fully independent sets of peliers, temperature sensors and control electronics. This unique format allows the user to run multiple thermally optimised reactions in a single run at exactly defined temperatures.

Another key feature is the small bench footprint of 18 x 28 x 19cm and 5.5kg weight which makes the thermocycler a truly portable instrument.

Yingtai Centrifuge Range

Labcare have been appointed as the UK distributor for the Yingtai Instrument Company, a manufacturer of high quality laboratory centrifuges. They provide a comprehensive range of bench top, refrigerated units and larger floor standing models. They offer a centrifuge for all laboratory requirements.

Each instrument comes with a one year warranty and is backed by the comprehensive support of Labcare Service.
