

# **Alliance Labels Ltd**

## **Environmental Policy Statement**

**May 2014**

ALIANCE LABELS LTD recognises its responsibilities for the environment and is committed to working towards minimising the environmental Impacts of its organisational activities.

We will introduce and maintain a documented environmental management system using BS EN ISO14001:2004 as the framework within which to evaluate and improve our environmental performance.

We will comply with relevant environmental legislation and will endeavor to stay ahead of proposed legislation by implementing the best practices of the industry wherever this is practical.

We will work towards improvement in our environmental performance by the conservation of Energy and Natural Resources, preventing pollution, the reduction, and where possible, the elimination of Emissions, Nuisances and Waste.

Our strategy is, wherever practicable to first prevent, and then re-use or recycle, and only as a last resort to dispose of waste, which will be safely managed.

We will work with our customers and suppliers in the development of returnable, re-usable and recyclable packaging.

Continual improvement will be demonstrated by the settling of quantifiable objectives and targets.

In all of these areas, management will take the lead in providing the commitment and focus to empower local teams to make the maximum contribution to improving environmental performance.

This includes the provision of the relevant information, training and resources necessary to enable all employees whose work has a potential environmental impact to make the maximum contribution to achieving business objectives and targets.
