

Pressure Systems Inspections from CTM Europe

- Is your pressure system working within safe operating limits?
- Are your Written Schemes of Examination current and complete?
- Are your pressure systems regularly inspected and maintained?
- Achieve effective system safety and stress-free PSSR (2000) compliance with CTM Europe
- Our inspection staff are qualified engineers and BCGA approved industry trainers

Learn how CTM Europe can help you

Systems Audit

A full audit of your vessel and pipework, plus the supply and fit of any necessary replacement parts

Written Schemes of Examination

Our competent personnel will draw up and certify your WSE, provide operating and emergency instructions, and keep good records

System Maintenance

We will carry out examinations at agreed intervals, managing any necessary remedial work according to a PPM schedule

CTM Europe's Pressure Systems Inspection service is intended for both owners of systems with a single regulator and short distribution pipework and those with more complicated systems, with longer more complicated pipework and multiple outlet and control points.

To book your Pressure Systems Inspection

In the first instance please click to www.ctmeurope.com or contact David Mitchell (Managing Director).
