The ASCO Group is the world's largest specialist oil and gas logistics company. Headquartered in Aberdeen, Scotland, the company employs over 1600 people worldwide.

ASCO has three primary service lines:

- **Oilfield logistics, including supply base management, the delivery of a variety of goods offshore and onshore via sea, air and road, land rig moves and fuel supply.**
- **Waste management, including industrial cleaning and technical and advisory services**
- **International logistics and freight management.**

Marine Services

In addition to our logistics service line, ASCO and Seletar combine to offer a wealth of marine services including:

- ships agency
- marine control
- project agency
- marine operations
- marine technical
- vessel chartering and charter management

SERVICE • EXCELLENCE • ABILITY

During early 2011, we established a team of project agents in order to adapt our services to meet the ever changing needs of the energy industry. Our project agent's objective is to satisfy the strategic needs of organisations whose complex requirements transcend international and continental borders.

Offering global coverage, our highly trained and focused team are available to advise and assist throughout the project lifecycle. The project agents attend planning meetings in remote locations, onshore and offshore – delivering expertise around the clock.

Our Project Agency services include:

- Facilitation of worldwide port call planning
- Coordination of client requirements with port authorities, agents, plant and equipment providers and service companies
- Guidance on legislative conformance
- Detailed cost tracking and prompt and accurate invoicing

Our Technical Team deliver a wide range of expertise and a responsive, cost effective approach to meet the demanding needs of vessel owners and operators.

We offer comprehensive provision and management of technical, safety and auditing services and a genuine 24-hour service.

Our services can be provided on a contractual or ad-hoc basis and, if required, by way of the provision of a dedicated implant within your organisation.

Our Marine Technical services include:

- Safety induction and inspection for all new vessel charters
- Vessel compliance in line with mandatory operational requirements
- Provision and management of vessel audit services
- Provision and development of proactive safety culture through regular and structured visits to client vessels
- Marine Warranty Surveys
- Development of safety procedures and marine manuals
- Monitoring of certification and Marine Key Performance Indicators (KPI's)
- Annual rescue and recovery validation trials for Emergency Response and Rescue Vessels (ERRV)
- Port capability assessments
- International Ship and Port Facility Security (ISPS) coordination and training
- Proactive involvement with advisory and regulatory bodies
- Safety coaching
- Accident and incident investigation
- Dynamic positioning system auditing
- Dive support vessel assurance and certificate of fitness provision

SERVICE • EXCELLENCE • ABILITY

Established to control and coordinate the safe and efficient movement of marine craft, our Marine Control operation is a permanently manned service located in Aberdeen Harbour.

This service has the responsibility to provide uninterrupted management and coordination of vessel movements whilst in the field.

Our Marine Control department works closely with the ASCO Operations desk to ensure appropriate movement of vessels within the harbour area.

By virtue of our Marine Control function being a multi-user resource, our clients enjoy the benefits of a dedicated facility without the cost restraints of a client specific asset.

Our Marine Control services include:

- Control of vessel movement and anchoring under normal and emergency conditions
- Fulfilment of offshore requirements making best use of vessel capabilities and deck space
- Vessel scheduling and estimated time of arrival (ETA) advice
- Detailed logging of all marine asset movements and operations
- Provision of information to aid safe navigation in respect of weather, tides and other hazards such as anchor buoys, mooring patterns and restriction zones
- Provision of vessel and cargo status
- Organisation of medical assistance to vessels from infield facilities
- Routine distribution of planned Marine Operations to maximise operational efficiency
- Supply of daily marine and shipping reports to aid client fleet planning
- Indemnity review for third party vessels calling at client installations
- Advice on available emergency assistance from localised resources

Scheduling of vessels to optimise efficiency

Operating around the clock from strategic locations, our experienced teams of Marine Coordinators can provide crucial support to your organisation.

Our work-scope extends to voyage planning, dry and liquid bulk water and fuel loadings, tank management and, should it ever be required, the allocation of marine facilities in the event of an emergency offshore.

Our Marine Operations services include:

- Management of vessel turnarounds in conjunction with the shipping teams (deck cargo) to meet required sailing deadlines
- Scheduling of vessels to optimise efficiency
- Chartering of spot vessels as required
- Provision of daily shipping plans
- Testing of fuel and pot water
- Organisation of vessel shares in conjunction with other operators
- Processing of vessel voyage reports to produce client briefs and prompt accurate invoicing

Vessel Chartering and Charter Management

email : marineinfo@ascoworld.com tel : +44 (0) 1224 357 100

ASCO Marine has extensive experience in providing support vessels best suited to meeting your requirements.

Our Marine Department employ staff with a wealth of knowledge on the sourcing, evaluation and chartering of all types of vessels. Vessels that we charter can be placed on an ASCO Charter Party – a robust tried and tested industry

approved document. Long term vessel and ad-hoc spot charters can be arranged as client demand dictates.

Through our in-depth knowledge of vessel markets and strong relationships within the marine and energy industries, we are well positioned to provide tailored solutions to often complex requirements.

- Liaison with vessel owners in aspects of maintenance and dry docking plans to mitigate operational interruption
- Proven track record of delivering innovative ideas
- Market know-how with industry wide contacts

- Administration of all charter hire invoices
- Management of appropriate indemnities
- Managing charter party compliance
