

THE DOOR BOOK

*For us doors are first and foremost furnishings.
We like our doors to draw inspiration from the
room, and to add something more than mere access
and privacy. It's what makes us stand out
from the crowd.*

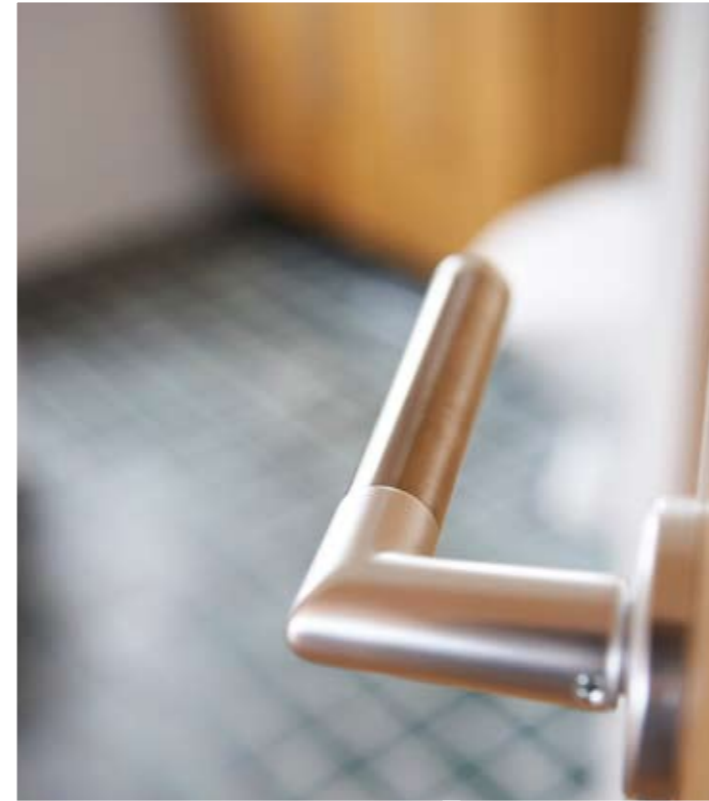

*And we feel you want the same thing,
which is why we know you'll keep your Dooria
doors for a long while. So to make this possible, and
to make your experience as agreeable as it ever can
be, we invest in the highest quality, convenient func-
tions and excellent design throughout.*

Inspiration

WEATHER

On a quiet summer's day the sun shines brightly; at night a thousand small stars dance on the sea. In winter, wind, rain and snow beat against the house. A home on the coast is tormented by the elements, caressed and abused by storms. Large glass sections and an outer door with sidelights let the heavens shine through, and stand guard when the weather turns foul. White inner doors with porthole windows welcome in light, give emphasis to the maritime setting and create a feeling of space.

DAYLIGHT

A modern apartment is a place for living, entertaining and rendezvous. But an apartment is also an oasis – a retreat for rest and contemplation. With wenge-stained interior doors your apartment fosters a clear-headed, warm-hearted feeling. And to create a cooler ambience, choose doors with a smooth, white finish. Dooria's product line also includes apartment entrance doors that can be matched to your interior furnishings in both materials, finish and design.

WARMTH

A good exterior door shuts out the cold and lets in your friends. It is part of the heart and soul of your home – it's the first thing people notice and the last thing they see when they bid farewell. But a good exterior door says more than this – it also provides security. Your country lifestyle is highlighted by classic four-panel interior doors, while clear glass also lets daylight shine through to spaces beyond.

CLARITY

Modern homes are characterized by open solutions and unconventional methods. Smooth surfaces abound and light is given room to play. Innovation and an intuitive choice of finish and materials let details catch the eye. And with well-integrated, clever functions homes sustain enduring value. Dooria's flexible range of doors gives you the freedom to create a home beyond the ordinary – and make it your own.

HAVEN

In a stunning location on a cliff by the sea, surrounded by trees, the house is in the heart of nature. The interior is reminiscent of the granite rocks and the billowing forest, and the concrete structure is complemented by solid oak doors. Sliding doors save space and create a sense of order. Generous glass surfaces on the interior doors and the exterior door bid you welcome and create a light and airy atmosphere.

GLEN

The alpine world provides unique experiences, winter, spring, summer or fall. With nature right on your doorstep you gladly spend time on the balcony just enjoying the view. Skiing and fishing are but a stone's throw away, to be rounded off with a heart-warming sauna. Surroundings like these call for a time-honoured design vernacular, with shiplap façades and striking wooden floors and doors, and solid wood interiors built to last for generations.

SILHOUETTE

Intriguing perspectives in harmony with dramatic natural lighting. Discrete finishes lend taste and character. Modernistic architecture is no longer exclusively white – repeat the colour of your furnishings in your doors, an interior decorating idea that both unites conventions, and challenges them too. And why not complete the picture with a frosted glass door as a contrast to the vibrant, painted surfaces.

KUNGSATER JUBILEE

The first of the carpentry shops that today form part of Dooria was founded just over one hundred years ago. We are proud of our age, and in order to celebrate our anniversary we have designed a new door – Kungsater Jubilee. It is a classic wooden door with a contemporary look. A door distinguished by our history, and imbued with our feeling for design and the craftsman's art. Kungsater Jubilee, with its traditional features in a modern interpretation, is a door with innumerable applications.

Exterior doors

Varberg 1217

CHOOSING THE RIGHT EXTERIOR DOOR

Choosing an exterior door should be easy, even though there are obviously many choices to make. Dooria's flexible set-up helps you through the selection process.

There's a lot to think about – not just finish and design, but also safety, quality, the glass, fittings and other accessories. Dooria's selection of exterior doors is divided into two styles, modern and classic, and there are a number of models to choose from. The system is simple, and we're pretty sure you'll find a door that suits you.

FINISH AND DESIGN

Appearance is the first thing we notice. And in this regard doors don't differ much from anything else, or from people for that matter. So first and foremost you should of course always rely on your own taste when choosing a door for your home. And the possibilities are endless, for the range is enormous – from completely smooth doors to doors with routed details, decorative beading, mullions and exciting geometric patterns. Dooria's exterior doors are available finished in thousands of colours, and in oiled or varnished oak and pine. Most of our models can also be supplied as paired versions, with or without glassed doorlights.

FOR SAFETY'S SAKE

Dooria's exterior doors are built in a stable, five-layer design and have a very high security standard, with sturdy door jambs, hook bolt locks and security pins even in

their basic versions. The robust design also contributes to the door's long life. Our doors can be supplied with reinforced fire and noise protection, which involves extra mineral wool insulation and classification according to Swedish fire safety class EI30.

EXTRA

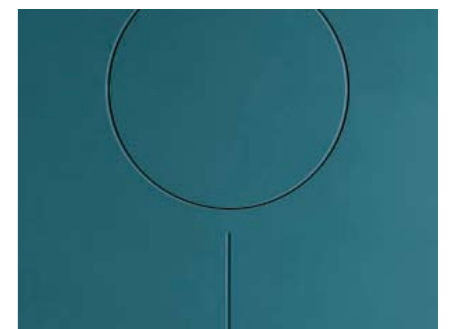

Dooria's flexible range of doors provides you with great opportunities of adapting your selection before you place your order. Choose a handle that suits the door and your home from our assortment of selected quality handles from HOPPE – with finishes and mechanisms that last and last. And why not complement your exterior door with sidelights to give the entry extra breadth and create a welcoming atmosphere in the hallway.

ALMOST EVERYTHING IN ONE CATALOGUE

You will find our assortment of exterior doors in the following pages. However, not every imaginable version is included – were we to list every type of handle, edging, glass, finish and combinations of finish, the choices would be almost endless. And that's the way we like it. Because the choice is yours.

Raised solid wood beading speaks of craftsmanship.

Patterns can be routed into the door; a simple, durable alternative.

The Merit series with its hidden hinges and flush glass provides a contemporary feeling.

Modern

MODERN EXTERIOR DOORS

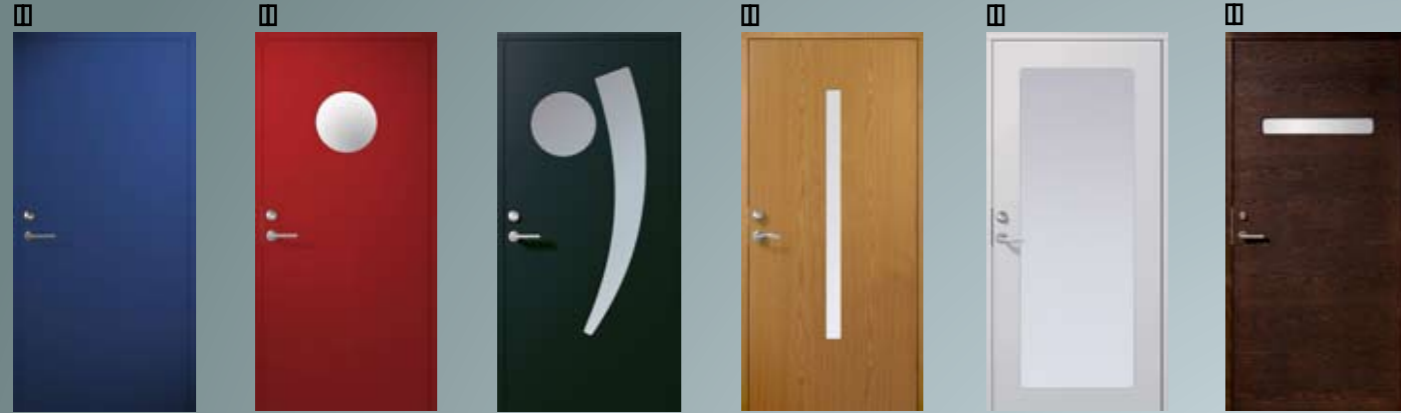

Spartan, Euclidean, Contemporary

Today's dynamic, clean architecture demands doors that speak the same language. Smooth surfaces and simple glass shapes reinforce a home's appearance. Combine this with thoughtful details and exciting materials and finishes to create a personal entryway.

MERIT

A designer door with hidden hinges, integral double insulating glass, without raised frames. Supplied finished in white, or your choice of NCS S finish, oak mocha, oiled oak, with your choice of glass. Plain inside face.

Interior doors

Kungsäter 523

CHOOSING THE RIGHT INTERIOR DOOR

Interior doors are so important. The right design, in the right place, has the ability to transform its surroundings.

A well-chosen interior door reflects the style of a home, and also has a complementary quality. An interior door imparts character and style to the décor. Dooria's range of interior doors is easy to understand and simple to use, and yet we are still able to offer a wealth of designs and features, glass panels and every colour of the rainbow. Leaf through the following pages, and choose your special favourite.

STYLES AND DESIGNS

We wanted to make selecting a door easy, without limiting your choices, so we divided our interior doors into three groups of styles – classic, modern and Addera. You will find traditional panelled doors in different designs with many alternative finishes in the classic assortment. Our modern interior doors have contemporary designs, simple lines and interesting features. Finally, Addera is a cross-over door with many possibilities – a flexible door to suit almost every setting.

FINISHES AND WOOD

Dooria's assortment encompasses both solid doors with high sound absorption qualities and excellent longevity, and elegant lightweight doors with honeycomb cores. Our interior doors can be delivered in thousands of colours, or in stained or varnished pine, oak, beach, cherry or birch. If you would like a painted door, then choos-

ing a colour is simple. Because we use the NCS S system – the same system you will find at your decorator centre – it's easy to have the door finished in exactly the right shade. Pay a visit to your decorator centre and find your favourite colour, or look up the NCS S code on the paint tin you used when you last decorated, and order your door in the same colour. It doesn't get easier than that.

YOUR OWN DESIGN

If you'd like to go a step beyond the choice of model and finish, our Addera series allows you to design your own door from the bottom up. Begin by selecting the type of wood and then add finish, any panes of glass and continue by placing one or more applications on the door. Or why not try out our user-friendly software at dooria.net, and let it guide you through the design process.

FEATURES THAT MAKE ALL THE DIFFERENCE

Solid wood frames, hidden hinges and recessed features in stainless steel – a few little details that make all the difference. And to save floor space, consider complementing your home with a sliding door with flush or raised fittings. One or more sliding doors also add a sense of order and elegance to the home – an important aspect in a modern setting.

Hidden hinges are an option that adds value.

Solid wood frames and large panels let the material shine through.

MODERN INTERIOR DOORS

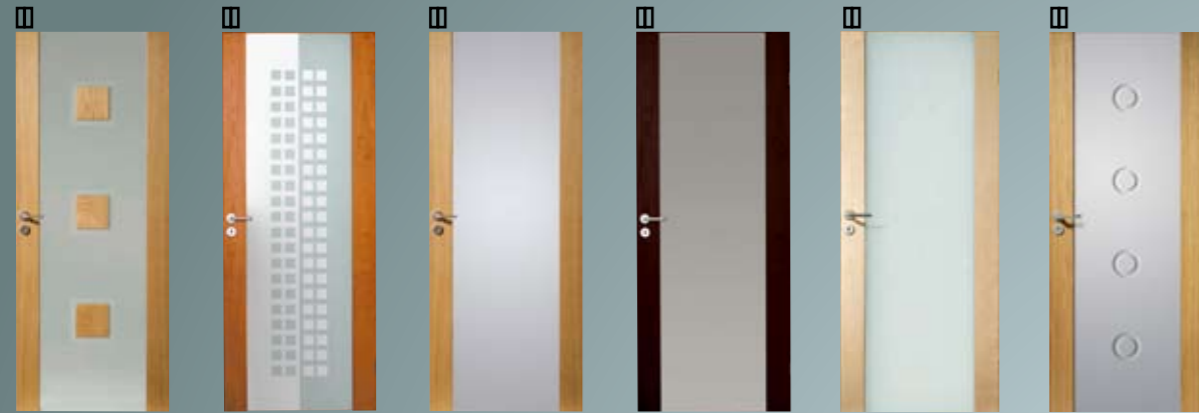

Beautiful features, unique complexions

Simple lines speak of modern times. Well-chosen features emphasize an inherent elegance. Interior doors are interior furnishings, and the modern, simple, yet flexible design idiom demands doors that take the concept further. Dooria's flexible assortment of modern interior doors makes creating a personalized home easy.

UNIVERSE

Stylistically pure glass doors with a simple design and decorative wooden features. Consider complementing with hidden hinges. Supplied with choice of glass, with wooden details, in white or choice of NCS S finish, or in oak, birch or cherry.

APARTMENT ENTRANCE DOORS

A safe security door on the landing need not be boring. Dooria provides a complete range of beautiful doors built around solid wood frames.

The assortment provides a range of surface finishes—painted, glazed, veneer or laminated—and a large selection of beading and routed panels. You can even have your door painted

in different colours on the inside and outside. The doors are simple to install and fulfil current safety requirements, with sturdy door jambs in a choice of woods or steel. And at

Dooria we will gladly go the extra mile and design a door entirely according to your wishes. Please contact Dooria Projects; see page 66, for further information.

A ball door in the same design as Addera lends a uniform appearance to your home.

A stylistically pure, plain door for a simple, elegant appearance. Or opt for a beautiful routed pattern of your choice to broaden your range of alternatives.

A hand crafted, solid door with raised wood beading provides a masterful, traditional look.

SAUNA DOORS

Our stylistically pure, welcoming sauna doors are manufactured from a single piece of hardened glass and are therefore extremely resistant to humidity and high temperatures. Sauna doors are available in clear or smoked glass. Our sauna doors are suitable for use both at home and in public spaces.

EXTERIOR DOOR OPTIONS

GLASS

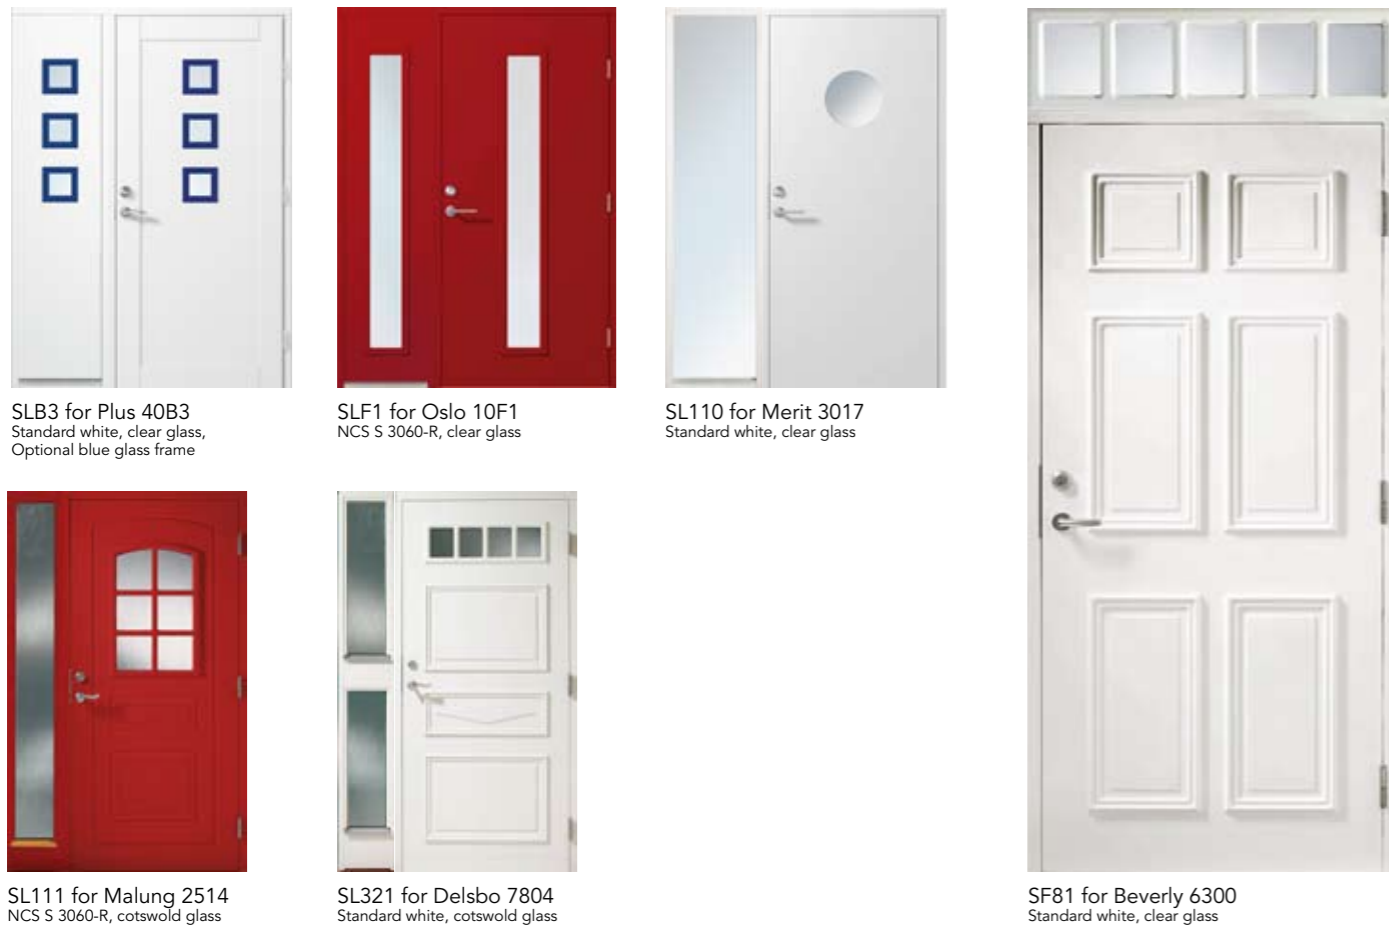

We provide a number of types of glass for our exterior door models. If you opt for a sidelight to your exterior door you are of course free to choose whether the glass in the door and sidelight shall be the same or different.

Clear glass Cotswold glass Decorative glass Smoked glass Leadlight glass Frosted glass

TOP LIGHTS AND SIDELIGHTS

Top lights and sidelights allow you to create a more open, welcoming doorway and a brighter entrance – a noticeable difference for the homeowner and guest alike. For your convenience, Dooria's top lights and sidelights can easily be supplied in the same colour, type of wood and glass as the door you have selected. You can opt to enhance your door with one or two sidelights, depending on the design of the façade, and your own wishes. Below are some examples of doors suitable for sidelights and top lights.

SLB3 for Plus 40B3
Standard white, clear glass,
Optional blue glass frame

SLF1 for Oslo 10F1
NCS S 3060-R, clear glass

SL110 for Merit 3017
Standard white, clear glass

SL111 for Malung 2514
NCS S 3060-R, cotswold glass

SL321 for Delsbo 7804
Standard white, cotswold glass

SF81 for Beverly 6300
Standard white, clear glass

HANDLES

Dooria offers a collection of quality handles, manufactured by the Swiss HOPPE company, specially selected to suit our range of exterior doors. Our handles are adapted to Nordic conditions; they are easy to install, provide long, trouble-free, precision use and hold their finish year in year out.

Key: F1: Aluminium, silver. F9: Aluminium, stainless steel nuance. * Fitted with the HOPPE quick fit handle for extra fast installation and no visible screws.

COLOURS

Dooria's exterior doors can be painted in any colour you like – just visit your local decorator centre and choose the colour you want. Because we use the NCS S system, an international standard for describing colours, it is easy to order a door in exactly the right shade. You can also have your door painted in one colour on the inside, and a different colour on the outside.

Colours often chosen for painted Dooria exterior doors:

Standard white
NCS S 0502-Y

Red
NCS S 3060-R

Brown
NCS S 8005-Y80R

Blue-green
NCS S 6020-B10G

Green
NCS S 7020-G10Y

Blue
NCS S 5040-R80B

Grey
NCS S 4000-N

Standard white
NCS S 0502-Y

Red
NCS S 3060-R

Brown
NCS S 8005-Y80R

Blue-green
NCS S 6020-B10G

Green
NCS S 7020-G10Y

Blue
NCS S 5040-R80B

Grey
NCS S 4000-N

Dark colours that absorb a lot of solar energy may overheat and flake or crack. Dooria provides no warranty on products finished in dark NCS S colours (7500 and up).

INTERIOR DOOR OPTIONS

GLASS

A door with glass panels allows light to pass from room to room, even when the door is closed. Dooria provides six different types of glass for interior doors. Choose the glass that suits your door, your taste and your furnishings.

Types of glass	Kungsäter	Fjordtre	Stil	Polar	Skog	Urban	Addera	Kungsäter Jubilee**
1. Clear glass* 4 mm hardened	•	•	•	•	•	•	•**	•**
2. Antique glass 4 mm	•	•	•	•	•	•		
3. Chamfered glass	•							
4. Smoked glass 4 mm hardened	•	•	•	•	•	•	•∞	
5. Hammered glass 4 mm hardened	•	•	•	•	•	•	•∞	
6. Frosted glass 4 mm hardened	•	•	•	•	•	•		
7. Opal glass*** 6 mm hardened							•∞	•∞

*Standard
** 6 mm hardened glass
*** Opal glass is a "frosted" glass with smooth surfaces on both sides which makes it easy to keep clean

COLOURS

We have colours for every taste – guaranteed. We use the NCS S system – the same system you’ve come across at the local decorator centre – which basically means that Dooria interior doors can be painted any colour you like. So pay a visit to your decorator centre, or get hold of the NCS S code from the last time you painted your indoor walls, and order a door in exactly the right shade. Achieving the perfect result doesn’t get any easier.

Colours often chosen for painted Dooria interior doors:

Dark colours that absorb a lot of solar energy may overheat and flake or crack. Dooria provides no warranty on products finished in dark NCS S colours (7500 and up).

SEALING STRIPS

A door jamb fitted with a sealing strip reduces the sound of its closing to a pleasant click, and also reduces the amount of noise the door lets pass. Sealing strips are provided with our door jambs, in colours adapted to jamb colours.

HANDLES

A good handle enhances a door. We chose handles manufactured by the Swiss HOPPE company specifically for our interior doors. The handles on display here are not only suited to the design of our doors, but also easy to install, comfortable to use and will go on working day in, day out, year after year.

Key: F1: Aluminium, silver. F1/F69: Aluminium, "silver/stainless" matt steel. F9: Aluminium, stainless steel nuance. F41: Satin chrome. F74-R: Brass, matt/brass polished, resista. * Fitted with the HOPPE quick fit handle for extra fast installation and no visible screws.

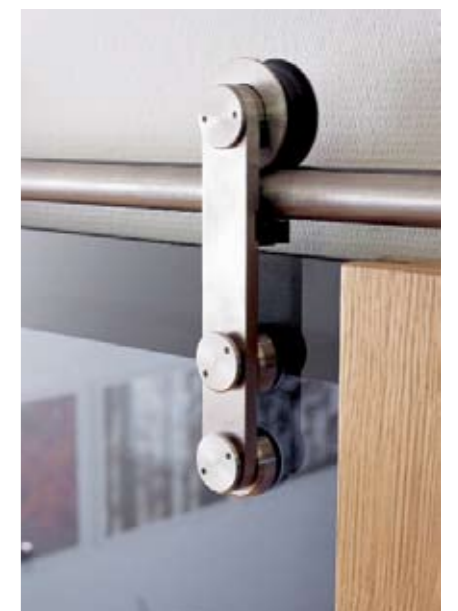

Universe 7004

SLIDING DOORS

Sliding doors save floor space and contribute to an orderly appearance. With a sliding door a doorway appears larger as the door disappears entirely when it is opened. The majority of Dooria's interior doors can be supplied in sliding versions, both as single doors and pairs.

WALL-MOUNTED SLIDING DOORS

Wall-mounted sliding doors slide along an overhead runner that is installed without encroaching on the wall. The installations have two alternative runners, in hidden or visible versions. Doors that are one module larger than the width of the door opening are used for wall-mounted sliding doors. A space equally as wide as the door is necessary at the side of the opening.

RECESSED SLIDING DOORS

Recessed sliding doors are completely hidden when open. The doors are hung from a beam structure built into the wall. Everything required for installation is supplied with the delivery of the sliding door jamb. Thanks to the sturdy top runner, a recessed sliding door jamb is able to bear a load of 70 kg.

DESIGN AND SAFETY

In order to guarantee quality and appearance, all wood details are selected by hand.

EXTERIOR DOOR CONSTRUCTION

Dooria's exterior doors have a very high degree of safety even in their basic versions. We build our doors as a stable and well-designed, five-layer structure. The doors are installed with three hinges with security pins in extra-sturdy frames. Dooria uses energy-saving insulating glass in its exterior doors.

Door design, from the outside in:

1. Durable solid wood features (only on applicable doors)
2. Insulating glass
3. Stable surface layer in veneer or HDF
4. Double layers of aluminium provide a stable structure, forced entry protection and act as a moisture shield
5. Solid wooden frame with EPS insulation
6. Extra-rigid door jamb, pre-drilled for simple installation

LOCKS AND FITTINGS

Our exterior doors are supplied with ASSA Evolution hook bolt locks complemented with cylinders approved by the Swedish Theft Prevention Association SSF. Ask your Dooria supplier for further information.

Lock equipment:

1. Cylinder approved by SSF
2. ASSA Evolution with hook bolt lock
3. Three hinges with security pins

Locks and fittings may differ from the illustrations depending on the choice of door.

INTERIOR DOOR CONSTRUCTION

Our Interior doors are supplied in two main designs – solid or moulded.

A solid door with panels and wood frames throughout is heavy, well-constructed and sound absorbing. Our painted solid doors have an MDF surface that provides a smooth, elegant appearance. Our moulded doors are the lighter alternative, built up from form pressed wood fibre panels and honeycomb-type spacer material. Why not complement the design with value-enhancing features such as hidden hinges, stainless steel fittings or one of our special surface treatments.

Solid wood door with panels in selected oak. Wood frame of selected oak and pine core.

Di-Form pressed door in wood fibre with honeycomb-type core.

Models not shown in this catalogue may differ in design.

DOOR MEASUREMENTS

	19.3 x 21/20	1920 x 2090/1990	925+925 x 2040/1940

TAKING CARE OF YOUR DOOR

Dooria doors are manufactured from selected materials and are of high quality. But a door is exposed to wear, both through use and by the forces of nature, and it must be treated properly if it is to withstand stress and maintain its appearance.

A porch roof protects the door against wind and weather.

An oiled exterior door should be oiled to saturation immediately after installation.

INSTALLING EXTERIOR DOORS

A door must be installed correctly if it is to last. If you are uncertain as to how the door should be installed, ask a professional. Our exterior doors are approved in section 7b in the Swedish SFDK standards and Norwegian NFDK standards and have good resistance to wind and weather. Because an exterior door is constantly affected by the elements it should be installed in a protective porch. The porch roof should protrude at least 120 mm from the wall and be installed no higher than 100 mm above the exterior door.

EXTERIOR OAK DOORS

Dooria's oiled exterior doors have already received basic treatment on delivery. When the door is installed it must be treated with oil immediately, preferably pigmented wood oil, so that it is fully saturated. The door must be oiled to saturation twice yearly. Doors in exposed positions may require maintenance more often.

EXTERIOR PINE DOORS

Pine doors receive basic oil treatment prior to delivery. When the door is installed it must be oiled or glazed immediately with naphtha based oil or a glaze suitable for pine. If the door is oiled, the treatment should be repeated annually.

PAINTED EXTERIOR DOORS

Our painted exterior doors are treated with alkyd paint and have very good weather protection. In order for the paint to maintain its protective function the door should be cleaned regularly, once or more yearly. Clean the door with lukewarm water, with soap or ammonia-free detergent added as necessary. Doors in bright colours are more sensitive to sunlight and should be waxed and/or polished regularly. Dooria recommends that the door's surface be treated annually with beeswax for prolonged durability. Scratches and suchlike should be touched-up immediately with a suitable paint. In the case of larger scratches etc., we recommend the use of filler and base coat on the damaged area.

INTERIOR DOORS

Interior doors in wood do best in an even indoor temperature and even humidity. Clean the doors by removing visible dirt whenever the home is cleaned. Where necessary wood doors may be wiped clean with a slightly damp cloth. Liquid soap or ammonia-free detergent may be added to water if dirt is difficult to remove. Clear-varnished interior doors that are stained or glazed, may be re-varnished as necessary. Before re-varnishing, the door must be sanded with fine sandpaper.

An oiled pine door should be treated with wood oil or glaze.

Beeswax helps the surface last longer.

DOORIA

The first carpentry workshop in today's Dooria group was founded just over 100 years ago. In those days a carpentry shop not only made doors, but also windows, kitchen cabinets and furniture, all of the highest quality. Today Dooria is one of Scandinavia's premier door manufacturers, with its head office in Stryn in Norway and a total of five factories in Norway and Sweden. We are proud of our long history – we take care of the expertise and craftsmanship we have built up over the years and the feeling for quality that was so characteristic of the business in the beginning is still with us today. Which is how we are able to say we have never built better doors than we do now.

DOORIA PROJEKT – FOR THE PROS

Doorია serves the project market through Dooria Projekt, a department that helps with advice to architects, contractors and builders, and takes care of sales of security doors and hall doors. Dooria Projekt also produces project-adapted designs and special technical solutions. Our fund of knowledge and experience and our substantial production apparatus makes us the ideal partner for every kind of project, from small to enormous. Feel free to contact us, either via your local distributor or 01355 243918 or at sales@dooria.co.uk.

PRODUCT FACTS

Measurements

Door measurements are given as jamb exterior measurements (KYM), module measurements (M) or door measurements. The jamb measurement indicates the door size including jamb, in mm. The module measurement describes the size the hole in the wall must be to have space for the jamb and door, and is given in decimeters. The door measurement is the exact door blade measurement, excluding jamb, in millimeters. In every case the width is given first, then height.

Hanging

Door hanging is indicated from the side the door opens toward, i.e. the side from which the hinges can be seen. To determine the hanging of a door, stand in front of it on the side toward which the door opens. Seen from this position, a door which has its hinges on the right is hung to the right. A door which is hung to the left has the hinges on the left.

Colour

Colours for painted doors are described and ordered according to the NCS S system.

Pair doors

A symbol next to doors in the catalogue shows which are available in pairs.

Customer-adapted design

Design requirements that are not met by the basic door assortment can be modified as required on the exterior door model Plus and the interior model Addera. The modifications are in respect of versions, features, design and measurements.

Fire and noise classification

Generally speaking, solid doors have better fire and noise protection qualities than lightweight doors. Dooria has a number of fire and noise classified models. Please refer to our price list or www.dooria.net for further information.

Doors shown in settings in the catalogue illustrations may be customer-adapted. For technical reasons the doors and colour samples shown in the catalogue may differ from reality. Always check colours at your decorator centre. We reserve the right to make changes in our product range and disclaim responsibility for any misprints etc.
