Votemark Ltd Use 1100 series to count votes at elections

Votemart have selected the 1100 CCD as their reader of choice for the critical task of reading the codes on local council voting papers and general election returns.
To date over 35 units have been installed at town halls in the uk and this is set to grow as major elections loom.

What VoteMark Say

BARCODE READERS

To record returns of your postal votes quickly and easily, we can provide you with the very latest industry standard hand held readers the Cipherlab 1100 selected to meet your requirements. With postal vote return recording likely to be a legal requirement in the very near future, we would encourage you to act now to make sure you have the technology ready and at your disposal.

Our barcode readers will enable you to scan barcodes on your declarations, postal vote return envelopes or ballot papers. You can also use them to record canvass form returns, staff appointment acceptance forms and P528 returns, or any documentation you produce that incorporates barcodes.   These could be downloaded later into your computer systems, enabling you to scan last minute postal votes received at the count and load the return data into your software at a later time.
