Anti-Graffiti Coatings 01902 450950

Concrete underpass coated with Nu-Guard® A.G.
Client: Milton Keynes Borough

Nu-Guard®AG

exterior anti-graffiti coating system

Lasting Protection against Vandalism and the Environment

- Anti-Graffiti
- Weatherproof
- Gives Up To 12 Years Protection
- Chemical Resistant
- Wide Colour Range

Nu-Guard®AG is a urethane based smooth anti-graffiti coating with an excellent decorative appearance and outstanding resistance to solvents and chemicals, making it an exceptional anti-vandal coating.

Nu-Guard®AG finish is available in full gloss, satin or matt, and is U.V. resistant.

Molineux Stadium Client: Wolverhampton Wanderers F.C. Architect: Alan Cotterill Partnership

Nu-Cryl®AG

Clear Protection

Economical Clear Protection for Brick, Stone and Concrete

- Anti-Graffiti
- Moisture Vapour Permeable
- Gives up to 15 years protection
- No Colour Change

Nu-Cryl®AG is an acrylic-based impregnation coating for exterior surfaces. Applied by brush or airless spray it provides protection against solvents, chemicals, grease, oil, dirt and weather damage while still allowing the substrate to 'breathe'.

Nu-Cryl®AG will not noticeably change the surface appearance and graffiti can be effectively removed using Hydron AG3 Graffiti Remover. No reapplication of Nu-Cryl®AG is necessary.

The consistency of Nu-Cryl®AG allows excellent coverage rates, making it an extremely cost effective method of achieving long life protection.

Communal Stairwells Woodhill Flats Client: London Borough of Camden

Nu-Flake®

multi-colour coating system

Attractive, Long-Life Protection against Vandalism

- Class 'O' Fire Propagation
- Anti-Graffiti
- Chemical Resistant
- Durable
- Non-Toxic, Odourless
- Gloss or Satin Finish

Nu-Flake® is a smooth, non-toxic coating system, providing a highly attractive, decorative appearance with outstanding resistance to solvents and chemicals, making it an excellent interior anti-vandal coating.

Nu-Flake® is available in a wide range of colours, either as a multi-colour flake effect, or combinations of colours, patterns and flakes, to suit your particular requirements.

Nu-Cryl® WRS

Water repellent solution

Acrylic impregnation for concrete, stone and masonry substrates

- Oil and Water Repellent to BS 6477:1992
- Prevents Frost Damage
- Prevents Organic Growth
- Does not Affect Original Colour

NU-CRYL® WRS is a unique acrylic oil and water repellent treatment.

Two grades are available :-
NU-CRYL® WRS is suitable for porous walls and facades preventing frost damage and organic growth. NU-CRYL® WRS also protects against soiling and the effects of acid rain.

NU-CRYL® WRS complies with the requirements for Class A and class B water repellents to BS 6477:1992.

NU-CRYL® WRS EXTRA is suitable for application to dense flooring substrates such as pedestrian areas, car parks and paving which is subjected to heavy wear and staining. NU-CRYL® WRS EXTRA will resist oil penetration. NU-CRYL® WRS EXTRA creates a non-stick surface which allows easy chewing gum removal.

Comyns Close, East Ham London Borough of Newham

Nu-Steel

metal coating system

Long Life Anti-Corrosion, Weatherproof, Steel Protection System

- Ultimate Corrosion Protection
- Long Life Weather Protection
- Chemical Resistant
- Abrasion Resistant
- Wide Colour Range

NU-STEEL S.P. is an economical decorative metal coating system, for the protection of all types of metal. NU-STEEL Q.D. SYSTEM is a quick drying system ideally suited for application to steelwork requiring a fast return to public use.

These systems will give protection up to 5 years conforming to BS 5493 the code of practice for the protective coating of iron and steel against corrosion.

NU-STEEL T.P. is a urethane-based system with an excellent decorative appearance and outstanding resistance to solvents, chemicals and weathering, making it a first choice coating system for use on steelwork.

This is a high performance product giving protection for a minimum of 10 years conforming to BS 5493 the code of practice for the protective coating of iron and steel against corrosion.

Center Parcs Longleat Main Contractor: TMS Joint Venture

Nu-Plex®

'high-build' textured coating

Long-Life Protection against Severe Climatic Conditions

- Flexible Textured Finish
- Vandal Deterrent
- Supremely Weatherproof
- Extra Long Life
- Excellent Adhesion
- Apply All-Year-Round

The Nu-Plex® range of coatings consists of three basic varieties. Nu-Plex® S.B. is a solvent based self coloured, self priming textured coating, specially developed for exterior applications requiring decoration and protection against harsh environments.

Nu-Plex® S.B. allows all-season application by roller or spray, even at low winter temperatures and will withstand light rain showers shortly after application.

Nu-Plex® W.B. is a water based textured coating for interior and exterior use.

Nu-Plex® Elastomeric is a non-abrasive textured coating for interior and exterior use providing exceptional resistance to cracking due to substrate movement.

Nu-Plex® is available in a wide range of colours which will not fade with age, and a life of at least 20 years can be expected.

Nu-Flame

A major Breakthrough in fire protection Coatings

Simply Overpaints Flammable Surfaces to achieve CLASS "O"

- Fire upgrades for walls and ceilings
- Tested on Class 4 Warrington Blue Board
- Water Based
- Protection for structural steel
- Clear or coloured timber finishes

Nu-Flame® Fire Upgrade Coatings for walls and ceilings

Nu-Flame® provides a comprehensive range of decorative paints developed for use over previously painted surfaces and is designed to convert flammable paint systems to class 'O' as required by building regulations.

Nu-Flame® Fire Upgrade Coatings for structural steel and cast iron. Nu-Flame® provides a comprehensive range of fire protection coatings giving the specifier the opportunity to specify attractive decorative finishes, while still complying with building regulations for fire protection.

Nu-Flame® Fire Upgrade Coatings for timber surfaces. Available in clear or coloured finishes, for bare or previously painted surfaces where surface spread of flame or fire protection needs to be controlled to class 'I' and class 'O'.

Nu-Base

floor coating system

Durable, Safe Attractive Protection for all Floors

- Hard Wearing & Safe
- Rapid Drying
- Chemical Resistant
- Impact Resistant
- Non-Slip

Nu-Base Floor Coating System combines long-term resistance to foot and vehicle traffic with excellent decorative and hygienic qualities.

Rapid drying feature allows fast return to service usually within 24 hours.

Ideal for all types of floor, Nu-Base Floor Coating System is hard-wearing and resists ingress of water, oil, grease, solvents and other chemicals.

Available in a wide range of colours in Smooth or Aggregated Anti-Skid Finish. Nu-Base Floor Coating System is ideal for use in factories, warehouses, workshops, transport depots, hospitals, food processing plants and other heavy wear areas.
