engineered  
from concept  
to reality...

KLM doors and accessories are designed and manufactured to provide the ultimate solution for your building project. Whether you are fitting out jackleg cabins, telecoms buildings, modular or traditional buildings, we have standard and bespoke doors and accessories to meet your demands.

see next page...

The KLM range of standard doors is fully compliant with Parts M and L of the building regulations, while combining low thermal value and excellent security performance. By careful selection of materials, finishes and fixings, KLM doors are designed to last for the lifetime of jackleg, telecoms and modular buildings.

If your requirement is for higher security, then we can help by supplying multi-point locking mechanisms, high security hinges, anti-jemmi strips and other enhancements to suit your needs.

**Standard leaf widths:**

860mm  
926mm  
1060mm

**Features:**

Steel plastisol leafs

Galvanised powder coated frames

Insulated core

Durable furniture

Over the past 25 years KLM has worked with a prestigious range of companies including the Elliott Group, Galliford Try and Caledonian. We have developed our product range and our expertise to ensure that our exterior doors, internal doors and building components keep our customers at the leading edge. KLM also specialise in servicing the shop fitting industry.
