

The company for precision engineering and machinery products specialising in CNC machining and serving such industries as Aerospace, Motorsport, Oil & Gas, Electronics and Packaging.

Teknimek Engineering have delivered a first class service along with first class quality to our customers since 1988 and have been ISO 9000 quality controlled since 2001.

Specialising in CNC Turning and CNC Milling as well as fabricated and electrical assemblies, we service customers nationwide and our experience allows us to offer a more complete service, including design advice, prototyping and volume production with full traceability of finished components.

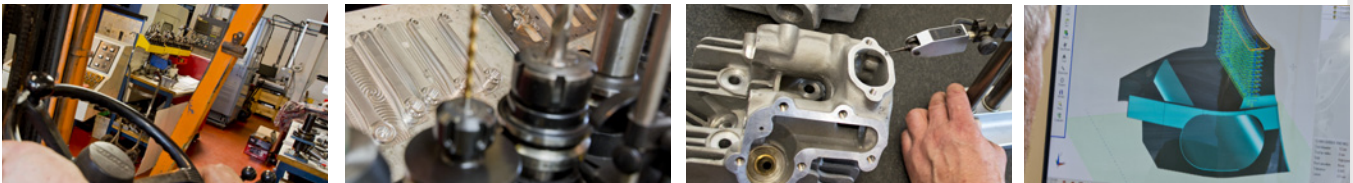

We provide a service in many different industrial areas such as Aerospace, motorsport, consumer electronics, marine, oil and gas and also diversifying into making our own products for the packaging industry and printing industry as well as other specialist sectors.

We started making components for customer's machines and then took over the complete manufacture, sales and distribution of some of the products.

These machines are aimed at the plastic coatings market and designed specifically for coating the inside of Fire extinguishers and cylinders in addition to the manufacture of machines aimed at the Ink/Printing industry.

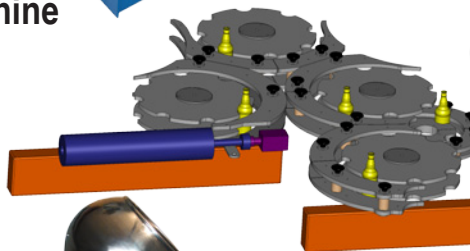

Why use Teknimek?

- Established since 1988
- ISO 9001 approved
- CNC Turning & Milling
- Fabrication services
- Electrical assemblies
- CAD Cam
- Design Services
- Prototyping
- Full Traceability

PRODUCTS

- ▶ Ink Proofer
- ▶ Dragee Pan
- ▶ Capping Machine
- ▶ Change Head
- ▶ Change Parts
- Fire Protection-
 - ▶ Spray Lining
 - ▶ Spin Coating

SERVICES

- ▶ CNC Milling
- ▶ CNC Turning
- ▶ CAD CAM
