

## Your Choice

Quality entrance and patio doors from the UK's leading profile manufacturer

PROFILE22<sup>®</sup>

## A high-quality door will greatly enhance the appearance and security of your home

It could be a traditional front door, a stylish patio door or the welcoming invitation offered by French doors. First impressions count – and with a Profile 22 door you can be sure they'll always be positive.

We offer a wide variety of door options from sleek composite entrance doors to innovative bi-folding doors to open up your home to the great outdoors.

Stylish, secure, energy efficient and requiring little maintenance, the Profile 22 range of doors will add an elegant and personal touch to your home.

Profile 22's entrance door systems are capable of achieving the Police's own security initiative Secured by Design.

# PVC-U panel doors

Panel doors have long been a popular choice for homeowners due to their appearance, durability and the wide range of styles available. Designed to be lightweight and robust, panel doors require very little maintenance and will retain their attractive finish for years to come.

Whether you live in a modern property or a period cottage, a Profile 22 panel door can be tailored to complement your home. All doors are built to order to your exact requirements and matching side panels are also available. PVC-U doors can be selected in a wide range of colours; you can even choose a coloured finish on the outside with a white or different-coloured finish on the inside.

Your entrance door is your visitors' first impression of your home so it's worth spending some time thinking about what impression you wish to give.

## Colours, wood-effect finishes and decorative options

Available in a wide choice of colours and styles, our full range includes 17 finishes, all designed to meet the needs of modern, design-conscious homeowners.

Guaranteed not to crack, peel or fade, your doors will maintain their authentic looks with virtually no maintenance.

You can also select from an extensive range of patterned glass options.

# Composite doors

First impressions count and you can make no better first impression than choosing a composite door that is virtually impossible to tell apart from a new timber door.

Composite doors combine all the strength and security of timber with far superior insulation properties. What's more you'll never have to paint them and they're impervious to weather.

Available in a wide choice of colours and styles you can also select from an extensive range of patterned glass options. In addition you have the option of either 1 or 2 matching side panels to create an even more striking entrance to your home.

## Composite door construction

- ① Strong through-colour GRP skin
- ② High-insulation foam core
- ③ Stable timber inner frame
- ④ Pioneering 100% recycled reinforcement
- ⑤ Aluminium threshold
- ⑥ Dedicated 70mm reinforced PVC-U frame
- ⑦ Full face aluminium hinge and lock plates
- ⑧ Weather-tested to BS6375

## Colours

# French doors

There's no disputing the aesthetic value of French doors. Their design offers a stylish alternative to patio doors with the doors opening inward or outward, depending on your choice. But just like the patio design, French doors give you greater access and allow more light to enter your home.

Profile 22 French doors are built to the same specification as our residential PVC-U doors with multi-point locking and toughened safety glass fitted as standard. To create a perfect match to your windows both our French and Patio door ranges are available in the same wide range of colours and wood-effect finishes as shown on page 4.

**Did you know?**  
French doors are the classic solution. They open wide to the outside and today's PVC-U models provide superior thermal and security performance.

## Popular French door configurations

## Sliding patio doors

High-performance, secure and undoubtedly stylish, slide open a Profile 22 patio door and you'll understand the benefits of choosing a market-leading product.

With their large glazing area, inline sliding doors are the perfect choice if you want to enjoy uninterrupted views of your garden. Up to four panels can be incorporated into our easy-glide opening system for a warm, secure and space-efficient solution.

### Did you know?

You can choose two, three or four-pane doors from the same great range of colours as our windows.

### Popular patio door configurations

## Bi-folding doors

Bi-folding doors are a more recent innovation in the PVC-U industry but are proving a popular choice in many styles of home. A wide range of door configurations can be accommodated with our flexible system, all of which can open in or out.

### Popular bi-folding door configurations

This is a small selection of the wide range of folding options available.

# How to keep your home safe

According to Home Office figures, burglary has increased in recent years, but that doesn't mean you have to be a victim.

It is possible to reduce your risk substantially. Figures suggest that by fitting simple security measures such as window locks and deadlocks you reduce your chances of being burgled tenfold.

Of course, if you fit the latest and best windows and doors you'll make it even harder for thieves – and the one thing they don't like is hard work!

## Key industry security standards

The simplest way to check whether a product is up to scratch is to look for the relevant industry standards.

BS EN 12608/PAS24

### PAS24 Doors

Awarded by the BSI to compliant products, these ratings confirm the ability of door frames, locks and glazing to withstand an attempted break-in.

### Secured by Design

Official Police Security Initiative

### Secured by Design

The Police's initiative that supports and promotes the principles of crime prevention through secure design and engineering.

## Simple measures to increase security

Windows should have lockable handles to make sure that thieves can't simply break the glass and reach through and open the window. As part of this, keys to windows and doors should be kept out of sight of potential thieves looking into your home.

Choose an installer who's offering a multi-point window lock which will secure directly into the frame. Ask whether the window and door system has been approved by the Police's own Secured by Design initiative. This scheme identifies products which meet the 'Police Preferred Specification'.

## Door essentials

A weak external door is an open invitation to a burglar and the quickest way in if they can kick out a panel or force a lock.

As with windows, choose products with multi-point locking systems that engage all around the frame.

The same goes for inline (sliding) patio doors, but additionally you should check they have anti-jacking systems. These prevent burglars levering them off their tracks (a particular Achilles heel of older models).

Check whether your home insurance has a particular requirement for door locks and check with your installer that they can fit the required type.

## Key security tips

- Keep tools and ladders locked away. Thieves might use them to break in.
- Fit an approved alarm.
- Consider security lighting. Many burglaries take place at night and thieves do not like the spotlight.
- Don't tempt thieves. Leaving a laptop in full view is an open invitation to break in.
- Keep doors and windows locked. The best systems are only effective when they're engaged!
