**Environmental Policy Statement**

**Introduction and aim**

David Reekie & Sons Ltd is a family-run machining company, operating from a site in Renfrew. Our main services include in-house subcontract machining and in-situ/on site machining. We are committed to ensuring that we take appropriate measures to protect the environment, prevent pollution and strive for sustainable and continual improvement. We recognise that our operations result in the use of natural resources mainly through energy consumption, whilst our insitu service generally has a positive affect on the environment by negating the requirement to ship large items of plant for repair.

It is our aim to comply with legislation and other requirements and to continue to reduce the environmental impacts of our business and operate in an environmentally responsible manner. This policy describes how we will achieve our aim.

**Responsibility**

This environmental policy applies to all of our operations including management, office services, machining processes, delivery and transportation (of equipment) and procurement. Our Operations Manager is responsible for ensuring that the policy is implemented. However, all employees have a responsibility in their area to ensure that the aims and objectives of the policy are met.

**Resources**

We will ensure that resources are available to enable us to achieve our objectives and targets.

**Framework for setting and reviewing environmental objectives and targets**  
**Monitoring and auditing**

David Reekie & Sons aims to run an EMS system to ISO14001 standards and we establish objectives and targets to control and reduce our significant environmental aspects where feasible.

**Communication**

This policy and progress against our objectives will be communicated to our employees via toolbox talks. This environmental policy is available on request. This policy is available on our website at <http://www.reekiemachining.co.uk>.
