

# VaccinePorter® Carrier Systems

- 3 Validated safe transportation of Vaccines
- B Lightweight design and easy handling
- Tamper-evident facility available
- Secure document storage
- B Numerous sizes and volumes to suit all applications
- Customised colours and branding

# Helapet VaccinePorter® carrier systems The quality solution for cold chain transportation

VaccinePorter® carrier systems are designed for the safe and controlled transportation of vaccines and temperature sensitive solutions. Featuring a replaceable inner moulding surrounded by a robust carrying bag, the VaccinePorter® range can effectively maintain a temperature threshold of between +2°C and +8°C for extended periods of time whatever the external conditions.

Available in a range of sizes and volume options to suit specific applications, each VaccinePorter® comes with validation information and complete set-up instructions using our cool packs.

Ideal for the controlled transit of vaccines and temperature sensitive solutions which require storage between +2°C and +8°C.

## It's all in the bag...

VaccinePorter® carriers comprise a simple 3 component system using thermally efficient materials. Inner chambers and cool packs are fully replaceable, providing a cost effective and assured method of maintaining thermal performance over time.

#### Replaceable Cool Packs

- Non-toxic, water-based composition
- Multiple use for up to 12 months
- Easily configured to the desired temperature threshold

#### Replaceable Polystyrene Inner

- Ready packed as standard in each VaccinePorter®
- Maintains the integrity and thermal performance
- · Easy to remove and replace

#### VaccinePorter® bag

- Robust carrying handles for easy transportation
- Visual document storage
- Secure Velcro® fastening with a tamper-evident tag facility
- · Variable colours and branding available

# Choose your replaceable components

Fully replaceable polystyrene inners, essential for maintaining the integrity and performance of the VaccinePorter® range. Available in a range of sizes, each inner is designed to fit comfortably inside the VaccinePorter® bag.

#### Storage & handling of your cool packs

Cool packs must be stacked flat on shelves no more than 4 high with 50mm of free air circulation.

Each of our cool packs can be re-used for up to **one year** if handled correctly. A visual check for any damages and weight compromise is needed to ensure maximum effectiveness.

# Personalise your Porter

Tailor design your VaccinePorter® carrier with an array of colours and bespoke branding to your requirements.

#### Colour\*

Stand out from the crowd by choosing from our range of different colour options.

#### Branding\*

We can add logos and desired artwork tailored to your design and location requirements.

\*Minimum order quantities apply when ordering custom bags and artwork.
