

Ink-Jet Filters

Allows for even distribution of ink ensuring high print quality whilst protecting against particulates which could damage the printer's operation.

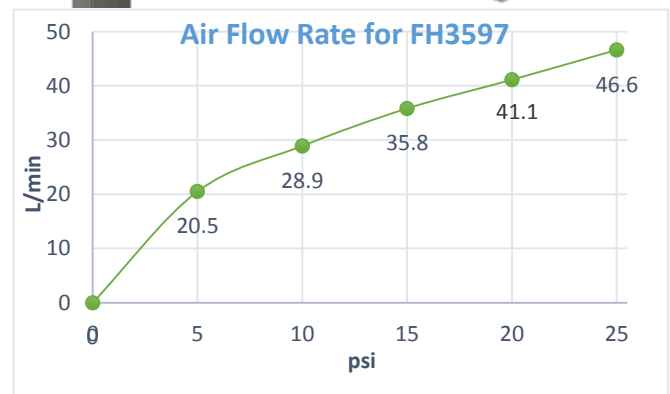

Features and benefits

- Exclusively made for ink-jet printers
- A wide range of media and micron options available.
- Manufactured with Borealis polypropylene
- Connector options include Jaco connectors, National Pipe Thread and Female Luer Lock
- Our tampo-printing technology allows us to incorporate your logo onto the filter housing, offering brand marketing opportunities.
- Tested to withstand up to 50 psi (3.44 bar)
- Spun welded capsules are also available

Testing available on request

- Bubble point tested
- Clean pressure drop
- Water-entry-pressure
- Flow rate
- Burst integrity test
- Pressure test

Order	Micron Size	Media	Connector	Size	Sales Unit
FH3597	40µm	WPE	1/8" National Pipe Thread	50mm	20 filters
			+ Jaco connectors
