

**Your route to value performance in Machine-to-Machine Communications**

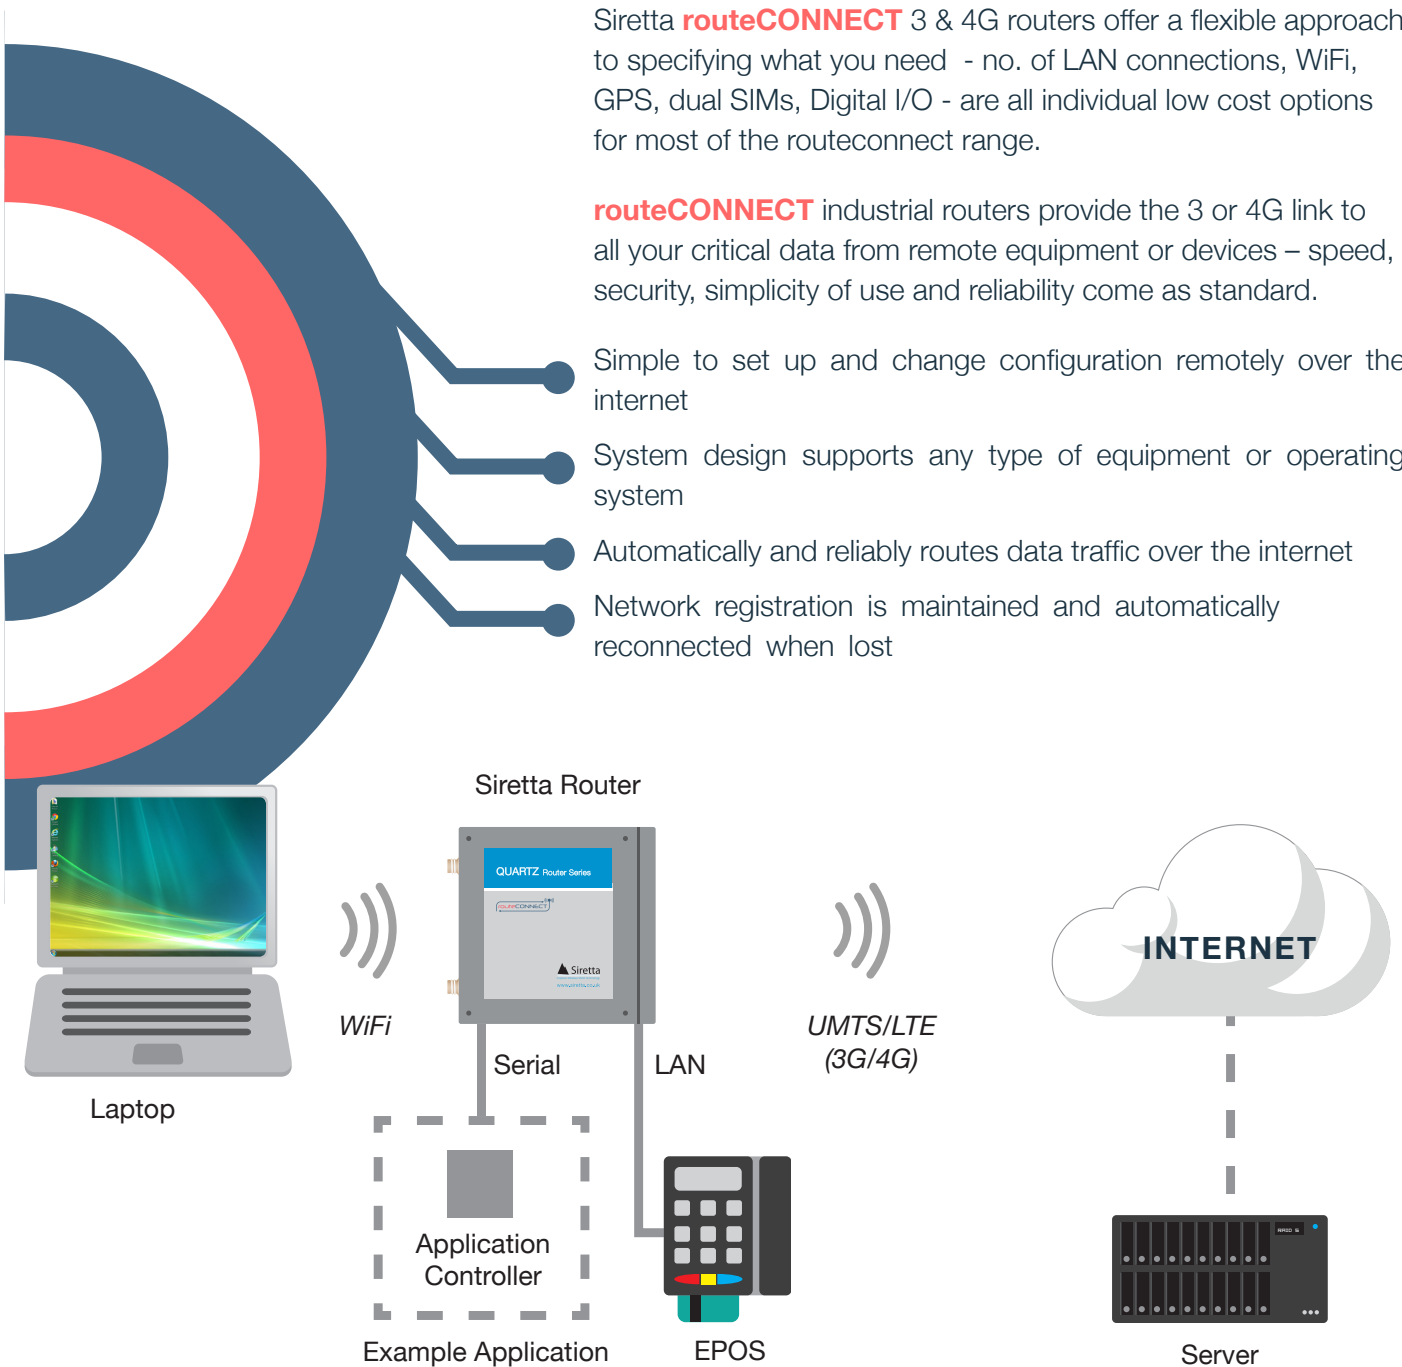

Connect with your remote devices or equipment over the cellular network – with simplicity – using the Siretta **routeCONNECT** router family.

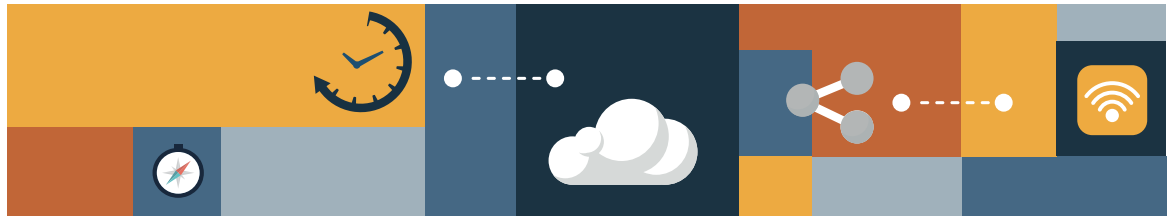

The **routeCONNECT** philosophy is: Consistent connection, Secure operation - and - Simplicity of set-up in all environments.

Siretta **routeCONNECT** 3 & 4G routers offer a flexible approach to specifying what you need - no. of LAN connections, WiFi, GPS, dual SIMs, Digital I/O - are all individual low cost options for most of the routeconnect range.

**routeCONNECT** industrial routers provide the 3 or 4G link to all your critical data from remote equipment or devices – speed, security, simplicity of use and reliability come as standard.

- Simple to set up and change configuration remotely over the internet
- System design supports any type of equipment or operating system
- Automatically and reliably routes data traffic over the internet
- Network registration is maintained and automatically reconnected when lost

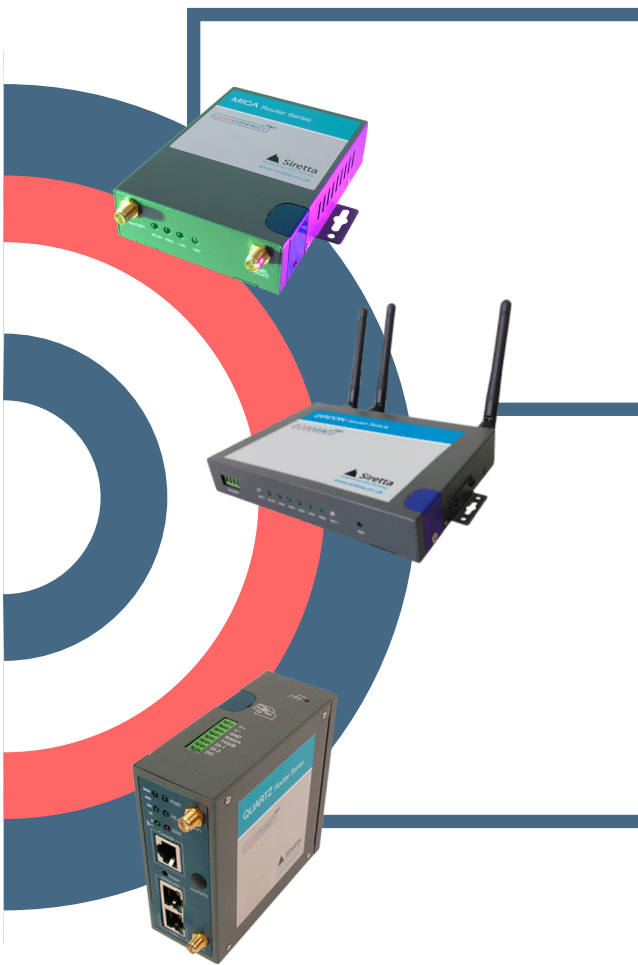

*Connect to the Internet-of-Things simply and reliably!*

*Select and Connect*

**routeCONNECT MICA (3G/4G)**

The perfect offering for 3G/4G applications requiring reliable, secure, high speed wireless connectivity.

- 2 x LAN
- Single SIM
- WiFi **OR** GPS Option

**routeCONNECT ZIRCON (3G/4G)**

Ideal for 3G/4G applications requiring multiple dedicated Ethernet ports over a reliable and secure, high speed cellular wireless connection.

- 4/5 x LAN
- Single or Dual SIM
- WiFi
- GPS Option

**routeCONNECT QUARTZ (3G/4G)**

The QUARTZ series of routers have been designed for use in industrial environments needing high performance and reliable 'always-on' internet connectivity

- 2 x LAN
- Dual SIM
- WiFi
- GPS Option
- RS232 linkCONNECT\* Port
- 3 x Digital I/O

\*linkCONNECT offers reliable RS232 serial connectivity over TCP/IP using European 3G / UMTS and 4G / LTE cellular networks.

**Data Transfer Speeds**

**3G (UMTS)**

- Download - Up to 21Mbps
- Upload - Up to 5.76Mbps

**4G (LTE)**

- Download - Up to 100Mbps
- Upload - Up to 50Mbps

**5 reasons to routeCONNECT your solution with Siretta today:**

- ✓ Open up opportunities by internet enabling remote equipment
- ✓ Save time by remotely accessing information from your installations
  - ✓ Deploy high speed within your application
- ✓ Benefit from flexible placement with its compact and industrial design
  - ✓ Secure and reliable connectivity around the clock
