

Servicing and Repair

ISS Projects Ltd offers a range of support services which can help you achieve your business objectives by reducing or contain your operating and service cost, keep your systems running at peak performance, reliably, safely and more efficiently. We have a team of experienced Engineers who carry out service, installation commissioning, fault finding and calibrations. Our Engineers are Compex certified and have IEEE 17th Edition they have also had manufacture specific training from companies like Vega, ENRAF, Endress and Hauser and Emerson/Rosemount.

Routine Maintenance

We provide planned routine maintenance visits as part of a planned preventative maintenance schedule (PPMS). The visits are arranged to best suit your PPMS needs. As part of the service visit calibration and Alarm testing can be carried out. A service report and certificates are produced as part of the service.

Spares and Repairs

ISS carry out repairs onsite, we supply spare or replacement parts. We also have spares for older discontinued systems.

Maintenance Contracts

ISS offers yearly maintenance contracts on all it's products and other vendors equipment. As part of the contract customers receive prompt response on all faults with telephone support included

Emergency Breakdown

ISS understand the issues faced by modern businesses in the event of a break down of safety or business critical systems and can provide a fast response by phone in the first instance followed up with a site visit if required usually within 48 hours.
