

onsite re-upholstery

All Makes & Models Recovered - Whatever the age, type or condition of your dental chair Meditelle's skilled upholsterers can restore it to its former glory.

Carried Out On Your Premises - Our experts will carry out the full re-upholstery process at your surgery, ensuring that your equipment is not out of service for any length of time, minimising disruption and downtime.

Infection Control - Our recovering service will ensure your patient chairs are safe and hygienic, removing any scrage marks, slits or tears in the vinyl covering that presents an infection control hazard. We can also transform the appearance and finish of older chairs to meet CQC sanitisation guidelines by removing any seams i.e. needle stitching) perforations which can be a source of bacterial ingress and thread which can absorb contaminants.

For a no-obligation quote please email us an image of the front and back of your chair/s along with your postcode to enquiry@meditelle.co.uk
