One or Two locks solutions

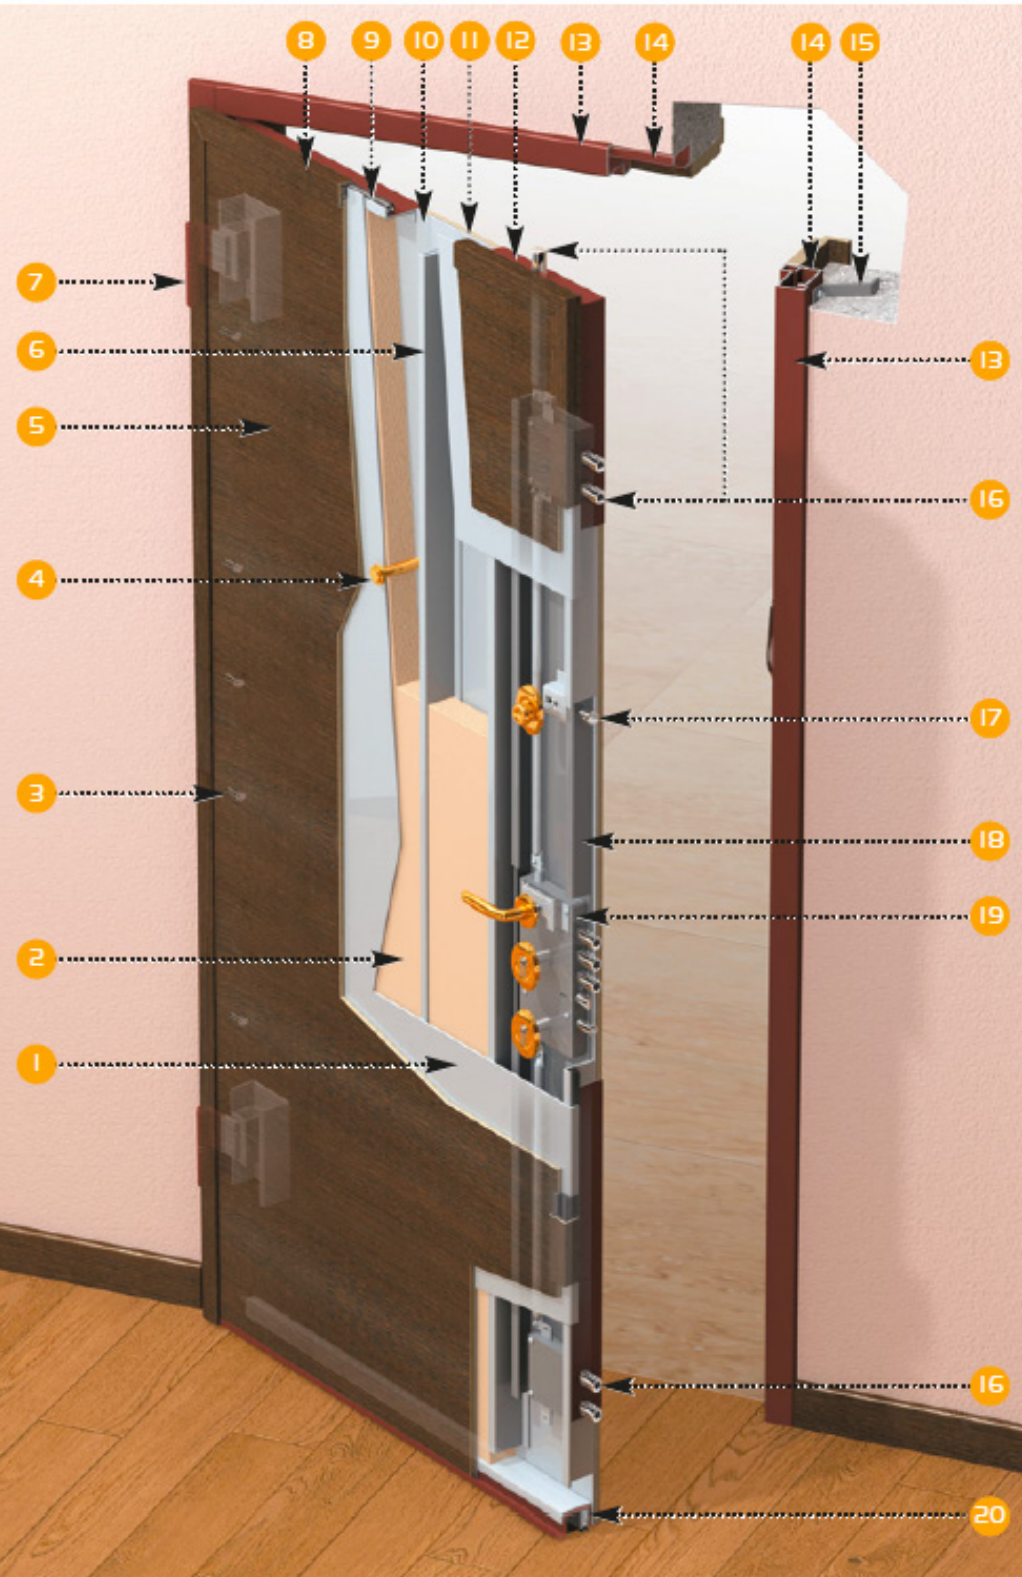

Key Suiting

Tested and accredited to provide confidence and peace of mind

All our security door sets comply with the Quality Standard for resistance forced entry - EN 1627 RC3 and RC4 and an increasing number have LPS 1175 SR2. Rigorous testing at both British and European laboratories is routinely undertaken to ensure that the product portfolio achieves these standards.

KSDW prides itself, with its suppliers, in providing the highest levels of customer services, working closely the architects, construction companies, contractors, interior designers and other specifiers as well as property owners, both residential and commercial and the public service.
