Descriptions are correct at time of publication, however these may be reviewed at any time and are subject to change without notice. E&OE (Errors and Omissions Excepted) which means that whilst every effort has been made to ensure that the information contained within this publication is accurate, specifications may vary or be subject to change at Belcom's discretion. As such, this publication should be used as a guide only. Exact details can be confirmed at point of enquiry. All cable renders are indicative of the product specified.

There are two major differences that separate Belcom from any other source of Fieldbus cables.

The first is stock, available cut to length and with a next day delivery across the UK or standard 2 day delivery to EIRE. The second is an unwavering commitment to providing the best quality Fieldbus cables available, this has been achieved by joining forces with Leoni special cables GmbH whose modern manufacturing plant in Northern Germany bristles with the latest in cable manufacturing technology. 'In process' continual testing cumulating in one of the best final test facilities we have seen, ensure strict adherence to performance standards critical to the performance of today's high speed data transfer requirements in the industrial network.

Many high tech intelligent process projects are functioning faultlessly over Leoni Fieldlink cables across the world, chemical, pharmaceutical, oil and gas, packaging, water treatment, food and beverage, automotive, you can name a process and there is already a strong presence or developing requirement for Fieldlink Fieldbus cables.

Cable is often an afterthought in the development of new technology process development, which often belies the time, research and testing that goes into producing specific cables for specific applications. With Belcom's range of Leoni Fieldlink cables you have the assurance and confidence that the best cable will be maintaining the integrity of your industrial network.

to view the product specification

Industrial Ethernet/Profinet has been developing rapidly over several years and now has the potential to transcend from the Corporate IT level right to the I/O device level on the production line.

Whilst there is little convergence between the Commercial Ethernet products and the industrial Applications, there is no reason why this should not develop a smoother integration in the future. For the cable there is a distinct look and feel of difference between Commercial Ethernet cable and Industrial Ethernet cable and whilst the technology may converge there are still very good reasons to keep these cables different. Primarily the environment in which Industrial Ethernet networks are being asked to operate is harsher and in many localised applications potentially destructive to standard Commercial Grade cables, hence "Industrial" Ethernet.

In this section you will find a broad range of Industrial Ethernet cables covering many environmental challenges, if you cannot, call us to discuss it and we will find you the optimum solution.

Several different types of PROFINET/Industrial Ethernet are available from stock at Belcom .

- Flame retardant
- Weld splatter resistant
- Highly flexible
- Permanent installation
- Halogen free
- Silicon free
- Sunlight resistant
- Oil resistant
- Cold resistant
- Chemical resistant
- Trailing cable
- RoHS compliant

PROFINET

FieldLink®

Type A Industrial Ethernet Cat 5e ES (PVC)

Cable Design

Wire

Conductor	Solid bare copper wire (22awg)	Ø 0,64 mm
Insulation	Polyethylene (PE)	Ø 1,50 mm

Core

Central Element	Filler
1° Layer	4 wires twisted (WH-YE-BU-0G)
Tape	Plastic tape overlapped
Easystrip Jacket	Soft Polyvinylchloride (PVC)
Screen	Alulamine foil overlapped
Braid	Tinned copper wire braid, 90% coverage

Outer Jacket	Polyvinylchloride (PVC), Green	Ø 6,5 ± 0,20 mm
Wall thickness	0,9 mm	

Characteristics

- Flame retardant acc. to IEC 60332-1-2 and UL 1685 (CSA FT 4),
- Limited oil resistant,
- Sunlight resistant acc. to UL 2556 Sec. 4.2.8.5,
- UL-Style 21694 (600 V)

Specification

Part Number	Type
L45467-J16-B35	Industrial Ethernet Cat5e ES, PROFINET cable for permanent installation, 2x2x22AWG1, UL listed: CMG and PLTC and ITC

Electrical Data @ 20°C

Loop resistance	≤	115	Ohm/km
Signal run time	≤	5,3	ns/m
Insulation resistance	≥	500	MOhm*km
Characteristic Impedance	1-100	MHz	100±15 Ohm
Surface Transfer Impedance	10	MHz	≤ 10 mOhm/m
Test Voltage (wire/wire/screen rms 50Hz min.)			2000 V

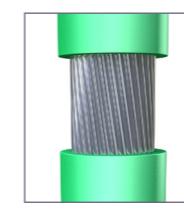

Frequency (MHz)	1	4	10	16	20	31,25	62,5	100
Attenuation typ. Value (dB/100m)	1,6	3,2	5,2	6,9	7,8	10,5	15	19,5
NEXT typ. Value (dB/100m)	80	75	70	65	63	60	55	50

The electrical requirements acc. to EN 50288-2-1.

Mechanical & Thermal Characteristics

Permissible temperature range	-40 ~ +80	°C
Min. Bending radius allowed	repeated	7,5 x Ø
Min. Bending radius allowed	single	3 x Ø
Tensile loading	≤	150 N
Weight (approx.)	66	kg/km

Also available with DataGuard® armoured protection :

DataGuard® SWA

Electrical requirements acc. to IEC 61156-5

Mechanical & Thermal Characteristics

Permissible temperature range	Fixed	-40 ~ +80	°C
Permissible temperature range	Flexing	-25 ~ +80	°C
Min. Bending radius allowed	single	4	x Ø
Min. Bending radius allowed	repeated	8	x Ø
Weight (approx.)		97	kg/km

Industrial Ethernet

FieldLink®

Cat6A for Flexible Installation

Cable Design

Wire

Conductor	Stranded tinned copper wire (23AWG)	Ø 0,72 mm
Insulation	Foamed Polyethylene (PE) with skin	Ø 1,58 mm

Screnned Pair

Screen	2 insulated wires twisted to a pair Alulamine foil overlapped
--------	--

Core

1° Layer	4 screened pairs (WH/BU-WH/0G-WH/GN-WH/BN)
Braid	Tinned copper wire braid, 85% coverage
Tape	Plastic tape overlapped

Outer Jacket

Outer Jacket	Polyvinylchloride (PVC), Green	Ø 8,7 ± 0,20 mm
--------------	--------------------------------	-----------------

INDUSTRIAL ETHERNET L45467-J416-C5

Characteristics

- Flame retardant acc. to IEC 60332-1-2,
- Sunlight resistant,
- Limited oil resistant,
- UL-Style 2461

Specification

Part Number	Type
L45467-J416-C5	Industrial Ethernet Cat6A, PROFINET cable for flexible installation, 4x2x23AWG7, UL recognised: AWM

Electrical Data @ 20°C

Loop resistance	≤	150	Ohm/km
Time delay	≤	5,13	ns/m
Insulation resistance	≥	500	MΩhm*km
Operating Voltage (effective value)	≤	80	V
Time delay skew	Pair to Pair	≤	20 ns/100m
Characteristic Impedance	100 MHz	100±5	Ohm
Coupling attenuation	30-100 MHz	≥	80 dB
Test Voltage (wire/wire/screen rms 50Hz min.)		800	V

Frequency (MHz)	1	4	8	10	16	20	25	31,25	62,5	100	200	250	300	400	500

Electrical requirements acc. to IEC 61156-5

Mechanical & Thermal Characteristics

Permissible temperature range	-40 ~ +80	°C
Min. Bending radius allowed	repeated	x Ø
Min. Bending radius allowed	single	x Ø
Pulling Force	≤ 150	N
Weight (approx.)	83	kg/km

Stripping Tool

1. After consulting the scale table on the back of the cutter, mark the cable with your thumb. Insert the cable using your thumb as a guide.

2. Close the clamp by turning the dial, for the best results first click the dial by 2 notches.

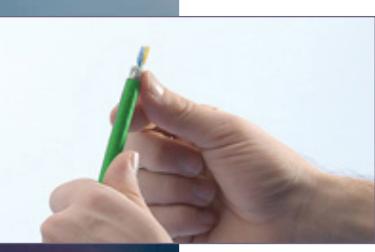

3. Rotate the tool twice away from you, then close the clamp fully and rotate twice more.

4. Pull the stripping tool lengthways from the cable. Avoid tilting the tool as this could damage the wires inside.

5. Inspect the resulting cable strip, if unsatisfactory rotate or replace the blade cassette and retry.

6. Remove the remaining plastic foil by slitting up the cable with a small slotted screw driver. Once clear attach the stripped cable to the connector of your choice.

FireFighter®

FireFighter cables are produced to exacting IEC standards for fire performance covering 60332-1 flame resistance for single cables and section 3 for bunched cables as well as low smoke generation (61034) and negligible halogen gas emission (60754-1). In addition to these, all FireFighter® cables are sheathed according to IEC60092-359 where applicable for electrical installation in ships as well as being 600 V rated for Tray Cable applications.

In order to meet demanding and diverse customer applications, FireFighter® performance materials are used in conjunction with other brands including DataGuard® (Armoured Cables), Armada® (MOG Cables), SureLAN® (Local area network cables), SureLIGHT® (Fibre Optic) and EventSeries® (Audio & Broadcast).

Whatever the application or installation, where public safety and reliability are concerned, FireFighter® Low smoke zero halogen properties have been proven to perform. It's not just LSZH sheath, It's a FireFighter® Cable.

Quality Management

Belcom recognise the importance of quality control and constantly monitor our quality performance to ensure compliance with relevant standards whether they are self imposed, statutory or regulatory.

Our management system is approved by DNV to BS-EN-ISO 9001:2008 standard and is an imperative part of our organisation.

Environmental documentation is available at www.belcom.co.uk/qa-environmental
