Suzie Lock A VOR Lock For Commercial Trailers

Suzie Lock is a neat device which prevents trailers from being used when out of MOT or faulty, Suzielok can also be used as a management tool or a theft deterrent.

How often has one of your trailers been used while in need of repair or when its MOT has expired? The VOR sign may have been displayed but a sign doesn't stop people from using the trailer!

Providing both a visual and physical barrier, Suzie Lock will stop any movement of unauthorised trailers, this neat little lock is particularly useful for yard or maintenance management of a trailer fleet.

Quickly snapped on to the suzie line of the trailer, a unique key locks Suzie Lock in place. With the lock in place no one will be able to move the trailer without notifying the manager or the key holder.

Suzielok also provides a very simple and cost effect deterrent against opportunistic theft.

An optional "direction to unlock" label is also available to aid communication when the trailer needs to be moved.

- **A Simple To Fit Trailer Movement Deterrent**
- **Robust Stainless Steel Manufacture**
- **Fits Most Standard Trailer Formats**
- **Individual Or Keyed Alike Variations**
- **Eliminates Unauthorised Loading Bay drive-offs**
- **Key Controlled Trailer Management**
- **Reduces Loading Bay Accidents**
- **Disables Trailers Rendered VOR**
