Air Brake Test Gauge 3 Gauge Test Kit

The Air Brake Test Gauge “The simple solution to air braking problems “ can save hours of time trying to find that faulty brake component within an air brake system

The Gauge kit is a portable, high quality air brake test kit and is specially designed to test pressure points at the ISO test point

The kit enables a full system test to be carried out in 20 minutes without the need to remove individual components.

Simply plug into the ISO test points on the vehicle at three points to establish which component is faulty.

The gauges will identify where a faulty component lies by highlighting where the air is not present within the system. By testing to the manufactures recommendations it is simple to identify faults

The gauges can also be used to set up your load sensing valves and actuating valves as they have a highly accurate scale which has a graduated scale down to 0.5 of a bar.

The Air Test Gauge ensures compliance with EC braking regulations.

Each 3 Gauge Kit Contains:

3 x 20 Bar 0.5% accuracy 4” gauges (25% pressure over rating)

3 x 5 metre black PVC hose rated up to 600 PSI

With M16 x 1.5 quick release test point adaptors

12” x 24” durable, protective case and foam insert

Installation and clear operating instructions

- **Enables Full System Testing**
- **Fit to All Makes**
- **Fast & Easy To Use**
- **Saves Money & Time**
- **Ensure Compliance to EC Regulations**
- **Hand Held & Light Weight**
- **Accurate Test**
- **Customers include the DOT & Police**
- **Protective Case**
