

aideing the automotive industry with state-of-the-art solutions... every time !!

Vehicle Incident Camera Seeing Is Believing!

The first Designer Video Black Box Recorder Quick release mounting and AV out allowing for attachment of monitor.

Ideal for all applications such as Law Enforcement, Hauliers, Taxi, Private Cars and much more.

The Black Vue is easily installed in less than a few minutes in any vehicle. The Camera bracket with sticky pad can be adjusted to suit any window.

Black Vue Software

When you remove the SD Card and plug it into the computer you can then simply analyse how the accident was occurred with the Road Eye software. This software will allow you to watch back on the event, collecting vital information about your speed and location. A built in Google Map will show you the journey on the road while on playback and will allow you to find your exact location.
