

KatKath™

TOMCAT URINARY CATHETER

Be kind to your patients

Features

- Non-reactive material
- Rotating suture collar
- Low coefficient of friction
- Kink resistant
- Crush resistant
- Lightweight
- Radiopaque
- No stylet required

Benefits

- Easy placement
- Flexible for maximum comfort
- Thin walled - larger bore lumen
- Great longitudinal strength
- Rounded atraumatic tip

Code	Description	Box quantity
VET98AK3518	Adjustable urinary catheter 3.5Fr/18cm	10
VET98KK3511	Tom cat urinary catheter 3.5Fr/11cm	10
VET98KK3514	Tom cat urinary catheter 3.5Fr/14cm	10

Available in boxes of 10 units

KatKath™

TOMCAT URINARY CATHETER

Be kind to your patients

ROTATING SUTURE COLLAR

The KatKath™ has a rotating suture collar - To allow natural rotation while in situ.

MORE FLEXIBLE

The catheter is made from a unique non-reactive material which has similar properties to Teflon® but is more flexible. More flexibility allows greater comfort.

GREAT LONGITUDINAL STRENGTH

The KatKath's increased flexibility does not diminish its ability in the effective treatment of blocked cats due to its great longitudinal strength and will not concertina even when encountering gross resistance.

CRUSH RESISTANT

The KatKath™ is almost impossible to crush and is also highly resistant to kinking. This allows placement without the use of a stylet. (Useful if flushing is required during the act of placement).

WELL TOLERATED

The KatKath™ may be left in place for hours or days, dependant on individual needs, and is extremely well tolerated by even the most difficult patients.

KATKATH™ SAVES TIME AND MONEY

There is now no longer any need to purchase two separate catheters for flushing blocked cats and leaving a different catheter in place. The KatKath™ is highly effective in both situations saving time, money and effort, by cutting two procedures down to one.
