SPIROLL PRESTRESSING SERVICES

Health and safety in the prestressed-concrete industry is firmly under the spotlight. Although awareness of the potential hazards has certainly increased, more can be done to make the process safer for all concerned.

There is no room for error as failure of equipment or procedures can prove fatal. As a manufacturer and supplier to the prestressed concrete industry for over 50 years, Spiroll has the expertise to help producers identify key issues and provide services and solutions that address them.
