A CCL Group Company

SPIROLLCAD²

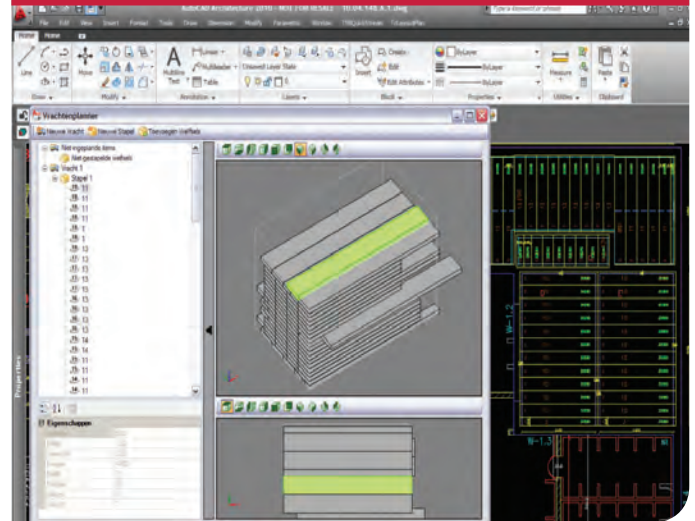

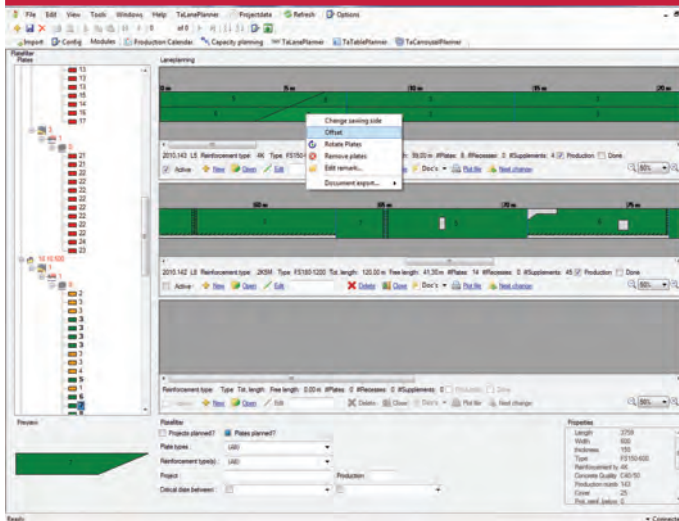

Based on AutoCAD, SpirollCAD² is a complete design and production software package for hollowcore slabs. Control during hollowcore production is vital, and SpirollCAD² enables this through all stages of the process from design and calculations to floor layouts; to production planning and drawings; right through to administration, logistics, and fixing of the finished product on site.

DESCRIPTION

- Complete control of hollowcore production
- Modular – design/planning/administration/logistics
- Based on AutoCAD
- Works to EC and BS codes
- Rental or purchase options

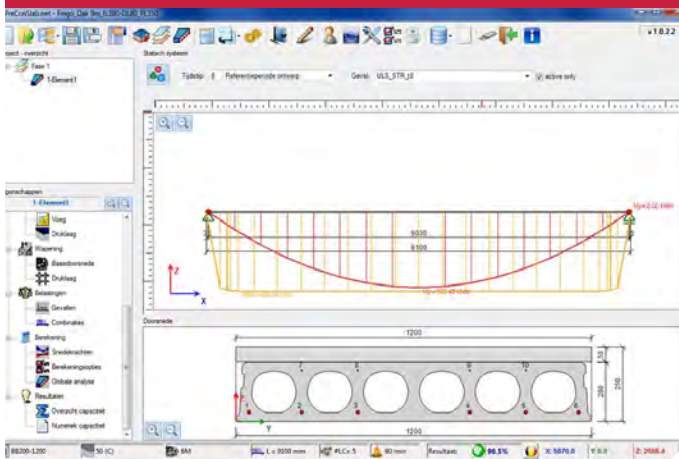

FEATURES

- One-click design calculations
- 2D and 3D layout views
- Integrates with BIM – e.g. Revit, Navisworks
- Common AutoCAD controls
- Preset parameters specific to each customer
- Full technical support

BENEFITS

- Greater accuracy and efficiency, from design to despatch
- Increased automation
- Produce the right slabs at the right times for each project
- Traceability throughout the workflow
- Planning and control over BOM reduces wastage
