

Solutex Recycling Systems & Equipment

OVERVIEW

Our machines are used worldwide. The high quality construction and constant product development ensure our machines meet market demands exactly year after year.

Our systems can play a vital part in your companies strategy for lower costs and higher environmental standards.

Recycling and waste minimisation are key functions of our equipment.

Health and safety is a key issue that we take seriously and our equipment meets or exceeds current standards.

We have a wealth of experience and our customers can vouch for our knowledge and expertise in providing them with standard or custom built solutions.

OUR STRENGTHS

Easy access to our services and fast reaction times to provide total customer support.

Fast and reliable supply of consumables and spare parts from stock.

We offer help and advice on issues such as explosion protection, ATEX and water management.

Use of our test laboratory for evaporation and distillation tests.

On site pilot testing.

The number one choice with over 38,000 units worldwide.

PURCHASE OPTIONS

Choose from outright purchase or Lease Rental options on Equipment.

Most major credit cards accepted for equipment, consumables and spare parts.

Recycling, Cleaning and Compacting

Solvent Recycling Systems

The largest range of solvent distillation units with models from 15 litres capacity to over 3000 litres.

Choose from the wide range of options available to meet your exact requirements and recycle virtually any solvent. Systems with vacuum, automatic loading and unloading for flammable and non flammable solvents.

Choose from a wide range of models:

Economic Distatic standard.

Distatic Professional with added automation

Dynamic Professional, self cleaning boiler and added automation.

Industrial series for high production

Fractionating columns

SM/DM series for degreasing plants

Water Evaporators and Concentrators

Water treatment systems for many applications.

Choose from the economic Ci series of water concentrators or the range of high performance water vacuum evaporators for all types of wastewater treatment. Systems from just 10 litres per hour to many thousands.

Vacuum evaporators feature an energy efficient system that evaporates water at just 35°C under vacuum. High quality distillate can be reused in the production cycle or discharged to sewer. Units are fully automated for unattended operation.

Compact dimensions make them easy to install and simple

PLC controls provide easy operation. Complete turnkey packages available.

Solutex Recycling Systems & Equipment

HIGH QUALITY AND WELL PROVEN

Robust construction, innovative design, high quality and well proven over many years. These are the key points that apply to our range of equipment to provide you with an assurance of high performance and long life.

WIDE RANGE TO CHOOSE FROM

The largest range of equipment available anywhere. We have a machine for every application with a wide variety of options designed to meet your exact requirements.

Other products available include: paint mixing tables, detergents for washers, waste compactors and can washers.

SAFE AND EASY TO USE

All equipment is CE marked and is ATEX approved where necessary. All machines feature easy to use controls.

TECHNICAL SUPPORT

Help and advice is available free before, during and after purchase. We will help you select the right machine and can advise on installation. We can also install, commission and train operators if required.

AFTER SALES SUPPORT

Spare parts, consumables and servicing on or off site.

Recycling, Cleaning and Compacting

Paint Spray Gun Washing Machines

Wide range of high performance manual and automatic spray gun cleaning systems for solvent or water based paints or a combination of both. Innovative design with patented features make these units the number one choice.

Solvent washers can be combined with a solvent distiller to recycle those valuable solvents and save money.

Parts Washing Machines

Wide range of high performance manual and automatic parts cleaning systems for use with solvents or water based detergents. Solvent washers are ATEX certified with inbuilt vapour extraction systems.

Solvent washers can be combined with a solvent distiller to recycle those valuable solvents.

Choose from:

- Manual & automatic solvent Washers
- Cold water Washers
- Heated water Washers
- High pressure heated Washers
- Mobile Washers

Can & Drum Crushers

Our range of can and drum crushers includes pneumatic and electric options. Models for 30 litre and 205 litre drums. Pneumatic units are ATEX certified. Also available is a combined oil filter and 30 litre drum crusher with 15 tonne force. Waste oil is collected in a drum for easy disposal.

Why not wash your drums in our model 174B can washer for cans up to 30 litre capacity.
