

ORILINK® - Fluid Management Stock Control System

Simply Eradicates

- » Fluid not booked out
- » Incorrect volume booked
- » Fluid booked to the wrong job
- » Fluid top ups not booked at all

Real Benefits

- » Only permits authorised dispensing
- » Records & gives traceability on every dispense
- » Predominantly used for bulk oil installations but can be used for most fluids
- » Eradicates fluid shrinkage & maximises profitability
- » Simple to use, configure & manage
- » Advanced management reporting functionality
- » Stock inventory level indicators

System Features

- » Date & time of every dispense
- » Operator ID
- » Job number (alphanumeric)
- » Fluid name & part number
- » Quantity dispensed
- » Low level stock monitoring
- » Simultaneous dispensing to all points
- » Database manager with reports
- » Support for bar code, magnetic card or Dallas card reader

Full integration into many leading vehicle service management systems

- » Only dispense to a live WIP job number
- » Automatically posts the dispense onto a WIP job number
- » Stock adjust function capability
- » Unbroken loop from tanks to service invoice
