

Staging Arena Deck

Arena Deck is a high capacity, highly versatile decking systems based on 8ft x 4ft modules. The system can be constructed in a static arrangement with the use of self levelling screw jacks or can be constructed in a rolling configuration using high loading castors, making it ideal for touring scenarios. The construction easily flatpacks and the support legs allow an under stage space for storage and / or access. The system can be made into creative configurations with the use of special shapes, different surface finishes, LED recessed lighting strips, dbl height nodes allowing for multi levels, various stair options, bunkers, rolling risers, polycarbonate finishes, traps, lifts and turntables and much more.
