Real Solutions for Real Challenges

THE RIGHT CONNECTION

Dixon is a leading worldwide supplier of hose, hose assemblies, manifolds, valve systems, flame arresters, vents, couplings and accessories with a proven track record with the Engineering, Procurement and Construction contractor market. With an unsurpassed reputation and commitment to excellence, Dixon links robust quality controls with highly experienced people to provide innovative engineered solutions providing the correct specification of product for the application.

From design to commissioning our EPC customers benefit from access to the following resources.

Project Management

- Dedicated project co-ordinators
- Trained technical specialists
- Single point of contact
- Planning schedules
- On-time delivery
- Approved vendor status
- Project lifecycle management
- Over 100 years experience in hoses and couplings

Engineering & Design

- Technical specification & applied knowledge
- In-house engineering and production design
- Design & technical drawings
- Full SolidWorks facilities
- 3D modelling & printing

Manufacturing & Expertise

- ASME coded welders
- In-house CNC capabilities
- PED compliant
- NAHAD approved assemblers
- Exotic alloy fabrications
- International standards compliance (AS, BS, EN, ISO)

Inspection, Test & Traceability

- Carbon PMI
- Hydrostatic & air under water testing
- Destructive & non-destructive testing
- Liquid dye penetration
- Passivation / Pickling
- 3rd party inspection & test planning

Documentation & Commercial Support

- Document pack submission & controls
- Maintenance & procedural manuals
- International packing standards
- Storage & shipping
- Product tagging & identification
- Material certifications
- Certificate of conformance
- Country of origin
- Type approvals (DNV, ABS, Lloyds)
- Bank guarantees
- Product liability
- Dossier translation

“We are driven to provide ‘the right connection’ to a wide range of material transfer applications across all industries. Our strength in service, technical support, training and advice ensures the correct specification of bespoke hose assemblies, manifolds, valves and couplings engineered by Dixon.”

*Julie Crowe
Managing Director*

GLOBAL FOOTPRINT

With sales and distribution throughout the United Kingdom, Europe, the Middle East and Asia Pacific along with manufacturing and engineering facilities approved to ISO 9001, Dixon utilises its application based knowledge and current technologies to create products to solve challenges across a wide range of material transfer applications.

Our expanding global footprint ensures a 'local' and dedicated point of contact and access to a network of manufacturing and distribution centres.

Dixon has value add centres in multiple locations where customers have access to made to order hose assemblies, actuated valves, manifold assemblies and bespoke fittings for a wide variety of applications.

QUALITY ASSURANCE

Dixon products can be relied upon, as quality control starts at the innovative design stage, and is further supported with technologically advanced engineering and manufacturing processes.

Dixon will not compromise on quality control, utilising standards and inspection procedures at each critical step of the production process.

Our exacting standards are underpinned by the following international standards and certifications.

- ISO: 9001
- Pressure Equipment Directive 2014/68/EU
- DNV GL Type Approval
- ISPM15 Certifications

PRODUCT PORTFOLIO

Rubber Hose Assemblies

Metallic & PTFE Hose Assemblies

Hose & Pipe Fittings

Quick Disconnect Couplings

Liquid Level Sensing

Valves

Dry Disconnect Couplings

Fire Protection

Manifold Assemblies

Loading Arms

MARKETS & APPLICATIONS

Market Knowledge & Experience

Dixon understands the technical intricacies across global markets and industries.

The vast product portfolio enables our engineers to recommend and specify the correct components for material transfer applications.

Very few suppliers have this depth of knowledge, experience and expertise. Dixon always has its finger on the pulse with liquid, air and bulk material transfer along with the varying requirements from clients in different markets.

Hose Assembly Application

Other Applications

- Fuel Transfer
- High & low pressure
- Zero cross contamination
- Hazardous & non-hazardous
- Leak prevention
- Volatile organic compounds
- Deadly & flammable gases
- Zero omissions
- LNG processing

PROVEN SUCCESS

From the initial enquiry through to delivery of an order from an EPC Contractor, Dixon is dedicated to providing an outstanding service throughout the lifecycle of the project.

Dixon prides itself in being able to guide and support engineers in specifying the best products to meet their requirements and ensure the project is managed with the highest quality, service and technical know-how making Dixon 'the right connection' everytime.

- Over 50 years experience servicing EPC contractors
- Collectively supporting multi-billion dollar projects
- Part of an approved group of trusted suppliers
- Being one of the easiest companies to do business with
- Providing 'real solutions for real challenges' across the globe
