SCREENS & BLINDS

Whether you are looking for glare reduction, dimout or complete blackout, we have tailor made, marine tested blinds to suit your needs. Design everything to your specifications, from the fabric and colour through to the operation of the blind, we'll make sure you get a solution that's right for you.

SOLAR SCREENS

Marine tested, type approved and fully compliant with SOLAS bridge navigational safety regulations.

Our solar screens will keep your officers and crew safe and comfortable at sea whilst reducing your HVAC costs.

With a comprehensive range of sizes and shapes available you can be sure we have a solution for your vessel.

- Reduce temperatures by up to 15°C
- 93% Glare reduction
- Durable and marine tested
- Increase navigational safety
- Easy installation
- Reduce maintenance costs
- Protect against damaging UV light
- Unobtrusive designs to fit any window shape

AIR

NON CASSETTED

Perfect for areas where space is premium.

- Cost effective
- Lightweight
- Ideal for areas with limited space

AUTO

MOTORISED

Ideal for windows in hard to reach areas.

- Low maintenance, quiet
- Accepts voltages from 24VDC - 240VAC
- Operates individually or collectively

ECO

SOLAR POWERED

A solar powered, self sufficient, motorised solution

- Reduces ship energy use
- Charges in or out of direct sunlight
- Operates individually or collectively

BLACKOUT BLINDS

Blackout blinds help to keep your crew and passengers safe and comfortable on their journey. The marine tested design eliminates 99% of incoming light to ensure that your crew get the rest they need.

All our roller blackout blinds use IMO approved fabrics. Available in a range of colours with mould resistant options, to avoid damage caused in humid environments or areas where water is present.

- Eliminate 99% of incoming light
- Reduce cabin temperatures 15°C
- Durable, hard wearing, marine tested
- MED fabrics available
- Over 30 colour options available
- Wipe clean for easy maintenance
- Unobtrusive designs to fit any shaped window
- Provide onboard privacy and security day or night

AIR

NON CASSETTED

Perfect for areas where space is premium.

- Cost effective
- Lightweight
- Ideal for areas with limited space

AUTO

MOTORISED

Ideal for windows in hard to reach areas.

- Low maintenance, quiet
- Accepts voltages 24V DC - 240V AC
- Operates individually or collectively

ECO

SOLAR POWERED

A self sufficient, solar powered motorised solution.

- Reduces ship's energy use
- Charges in and out of direct sunlight
- Operates individually or collectively

DIMOUT BLINDS

The dimout roller blind provides optimum onboard privacy and comfort for your crew and passengers.

We provide a range of sheer fabrics to block out heat and UV light without obstructing the surrounding views, keeping your crew and passengers comfortable and happy throughout their voyage.

Install dimout roller blinds in public spaces to prolong the life of your soft furnishings.

- Allows plenty of light into interior
- Reduce temperatures by up to 15°C
- Block 97% of UV light
- MED approved fabrics available
- Reduce UV damage
- Over 40 colour options available
- Motorised options for awkward areas
- Unobtrusive designs to fit any window shape

AIR NON CASSETTED

Perfect for areas where space is premium.

- Cost effective
- Lightweight
- Ideal for areas with limited space

AUTO MOTORISED

Ideal for windows in hard to reach areas.

- Low maintenance, quiet
- Accepts voltages from 24V DC - 240V AC
- Operates individually or collectively

ECO SOLAR POWERED

A self sufficient, solar powered motorised solution.

- Reduces ship's energy use
- Charges in and out of direct sunlight
- Operates individually or collectively

DUAL BLINDS

The twin roller blinds provide 24-hour protection and comfort for your onboard spaces. The unique dual design, housed in a single cassette, can combine any of the solar films/privacy fabrics, and colours from across our range for a complete day to night solution.

Keep spaces cool and reduce the harmful impact of the sun with solar film or dimout fabric. Swap to a blackout fabric at night to provide privacy and a restful night for your passengers and crew.

- Provides a day to night solution
- Reduce temperatures by up to 15°C
- Select the combination for you
- Choose from IMO/MED fabrics
- Cut your onboard energy costs
- Durable & hard wearing
- Alternative to curtains
- Onboard privacy & security

AIR

NON CASSETTED OPTION

The non-cassetted version of our dual blind, is a cost-effective solution that is perfect for areas where space is at a premium.

Without the restrictions of a cassette, this solution is ideal for larger windows.

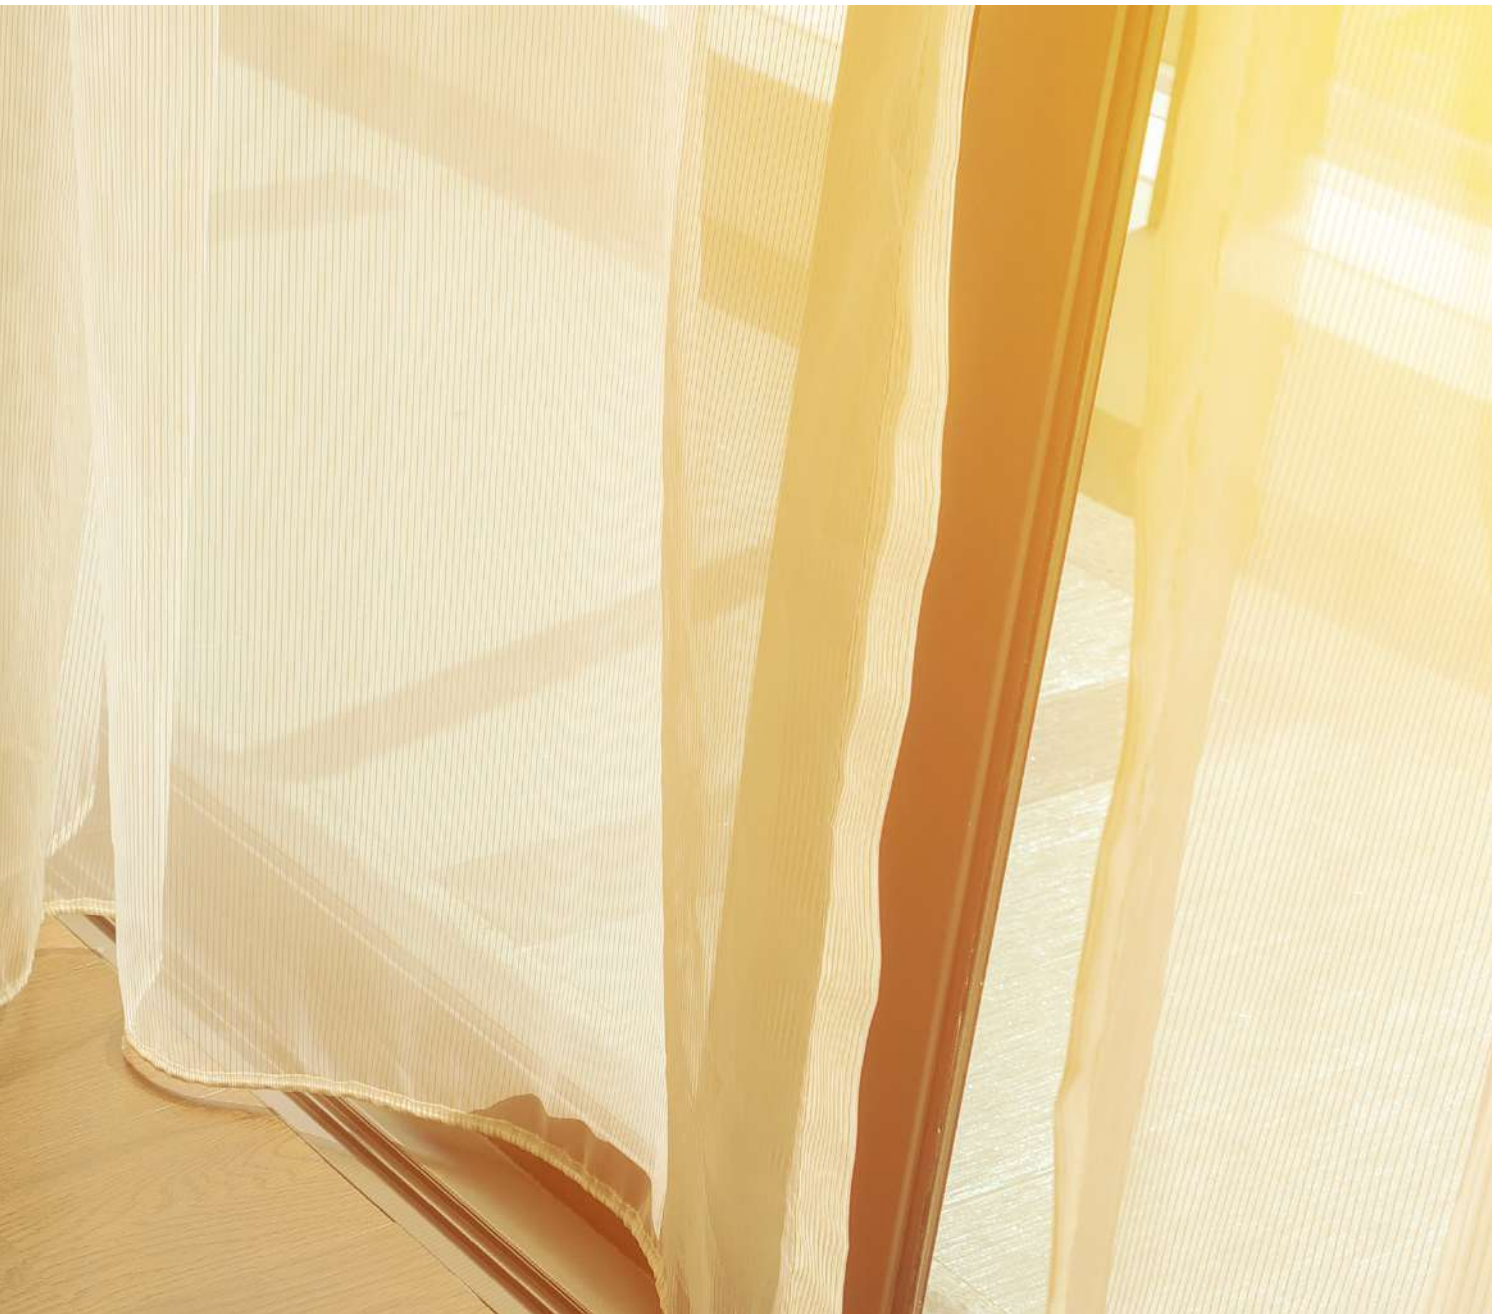

- Provides a 24 hour shading solution
- Cost effective
- Lightweight
- Ideal for installations with limited space available

A photograph showing a wooden floor with a light-colored wood grain. In the upper right, there are white curtains and a Roman blind. The Roman blind is partially unrolled, showing its pleated structure. The lighting is warm and soft, creating a cozy atmosphere.

CURTAINS, SHEERS & ROMAN BLINDS

Elevate your onboard spaces with our extensive range of made to measure IMO/MED approved marine Curtains, Sheers and Roman Blinds. All handcrafted by our experienced team of skilled tailors to meet your design requirements. With over 200 fabrics and colours to choose from, we have you covered.

CURTAINS

Our Marine Curtains will help enhance the onboard experience for your passengers and keep your crew comfortable and well rested. With a range of IMO/MED approved fabrics available, we have the solution for you.

Provide comfortable cabin and public spaces for your passengers, help your crew get the rest they need and partition areas to best utilise your onboard spaces.

We also supply matching tie backs and cushions to compliment your vessel's interior design.

All our curtains are made to measure with a choice of backing linings, handcrafted by our experienced team.

- Bespoke track options
- IMO/MED approved fabrics
- Handcrafted by expert tailors
- Wave, pencil or pinch pleat styles
- Choose from a wide range of colours and fabrics
- Access to over 200 fabric suppliers
- Flame retardant fabrics
- Machine washable for easy maintenance

SHEERS

Sheers and Voiles are a popular choice for spaces where you want to bring in a lot of natural light whilst still offering privacy for your passengers. Pair with curtains or blinds to allow flexible light control in your cabins and public spaces.

Sheers not only complement curtains, but also add depth to window dressings too. With a range of IMO/MED approved fabrics to choose from, they're sure to enhance the interior design and comfort of your vessel.

We also offer a wide range of tracking systems, tiebacks, and accessories to complement the finished product.

All our sheers are made to measure by our experienced team to suit the requirements of your vessel.

- Marine tested
- IMO/MED fabrics available
- Handcrafted by expert tailors
- Wave, Pinch and Pencil pleat styles
- A wide range of fabrics & colours
- Access to over 200 fabric suppliers
- Flame retardant fabrics
- Machine washable

MOTORISED

Motorised tracks provide an elegant option for hard to reach areas, large or heavy curtains. Motorisation can help reduce damage that can occur with manual operation, ideal for those onboard spaces that experience heavy use.

Powered by Somfy motors and capable of holding curtains up to 10m in length and 60kg in weight.

Wherever you are looking to hang curtains, we have you covered.

- Easy to install to either walls or ceilings
- Whisper quiet operation to maintain onboard ambience
- Battery powered or hard-wired options available
- Centre split or single pull operation
- Wall mount or hand held remote operation
- Prolong the life of curtains and sheers

ROMAN BLINDS

Stylish and versatile, our Roman Blinds help to effortlessly elevate your passenger areas, public spaces and luxury suites.

Roman Blinds are ideal for combining with other window treatments such as curtains, drapes, sheers or voiles. With a comprehensive range of IMO/MED approved fabrics available, and a variety of styles, you can be confident we have the right solution for you.

Choose matching fabrics to existing curtains or sheers or we'll help you find an alternative that will compliment your interior design.

Our blinds are handcrafted and made to measure with a choice of blackout or dimout linings.

- IMO/MED fabrics available
- Marine tested & Flame retardant
- Handcrafted by expert tailors
- Motorised options available
- Made to measure
- Guide wire & side-track systems available
- Child safe

PELMETS

Provide finishing touches to your window space with bespoke pelmets.

Manufactured in house by our upholstery team our pelmets are made from sustainably sourced wood, padded for the quality feel you want onboard and covered in your choice of fabric.

- Provide additional insulation
- Cover exposed curtain tracks
- Upholster with matching or complimentary curtain fabrics
- Painted, unpadded options available

A photograph of a sunset over the ocean, viewed from a ship's deck. The sun is low on the horizon, creating a bright orange glow. A dark metal railing runs across the middle of the frame. In the foreground, a person's silhouette is visible on the right side. A small, glowing yellow light fixture is mounted on the railing. The overall scene is warm and atmospheric.

ADHESIVE WINDOW FILM

Overcome the challenges of glare and condensation or increase protection during an emergency or accident at sea with our comprehensive range of specialist films. Fitted directly to existing glass, our adhesive films are an easy to install, cost effective solution to common challenges faced at sea.

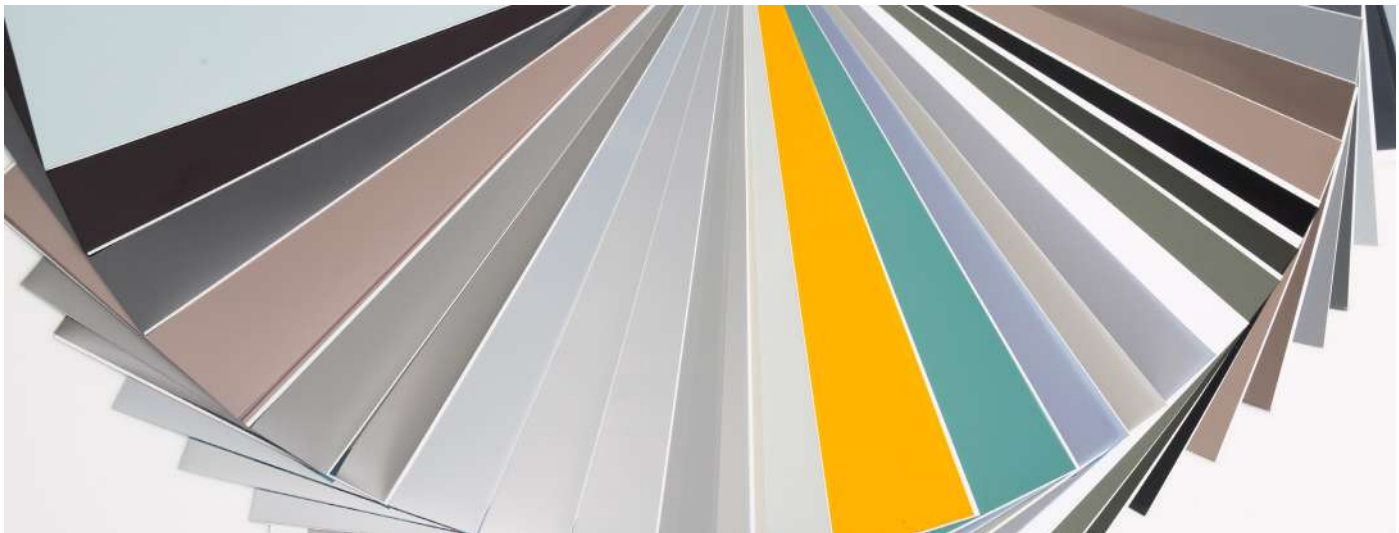

SOLAR FILM

Solar Film helps you keep your vessel cool and comfortable for your crew and passengers. Apply to non-navigational windows to reduce solar heat and control glare whilst allowing light to pass through.

Available in a range of sizes and colours to suit your operating environment, adhesive solar film is a cost-effective way to control onboard temperatures and glare while reducing air conditioning use.

Specialist polarised films are also available that change with outside light conditions.

- Up to 93% solar glare reduction
- Reduce interior temperatures 15°C
- Cut your onboard energy costs
- Reduce refurbishment costs associated with UV damage
- Available by the roll, by the metre, or cut to size
- Not suitable for bridge windows
- Alternative to blinds & curtains on non navigational windows

SAFETY FILM

Safety Film helps to protect your crew and vessel and deter unwelcome visitors. By installing to existing windows, it greatly reduces the risk of damage to your vessel's glass surfaces and provides a safer and more secure environment for everyone on board.

Glass protected with safety film will not break or shatter when struck, preventing injury and keeping your vessel secure.

Safety film is available by the roll, by the metre or supplied pre-cut to the exact shape and size of your windows.

- Reduce damage in turbulent conditions
- Added protection for crew when sailing through dangerous waters
- Shatter Proof
- Scratch resistant
- Quick and easy installation
- Available by the roll, by the metre, or cut to size and shape
- Provides a safer and more secure environment onboard

ANTI FOG FILM

Anti Fog Film provides clear visibility for your crew and unobstructed views for your passengers in any climate.

Fogged glass is common when warm air meets cold glass surfaces, condensation forms and visibility is reduced. Applying our Anti Fog film helps eliminate this problem.

Anti Fog film is the perfect solution for onboard spaces where moisture accumulates - particularly on the bridge and in cabins.

Provide clear views for your crew and passengers, while reducing the need to install expensive window heaters.

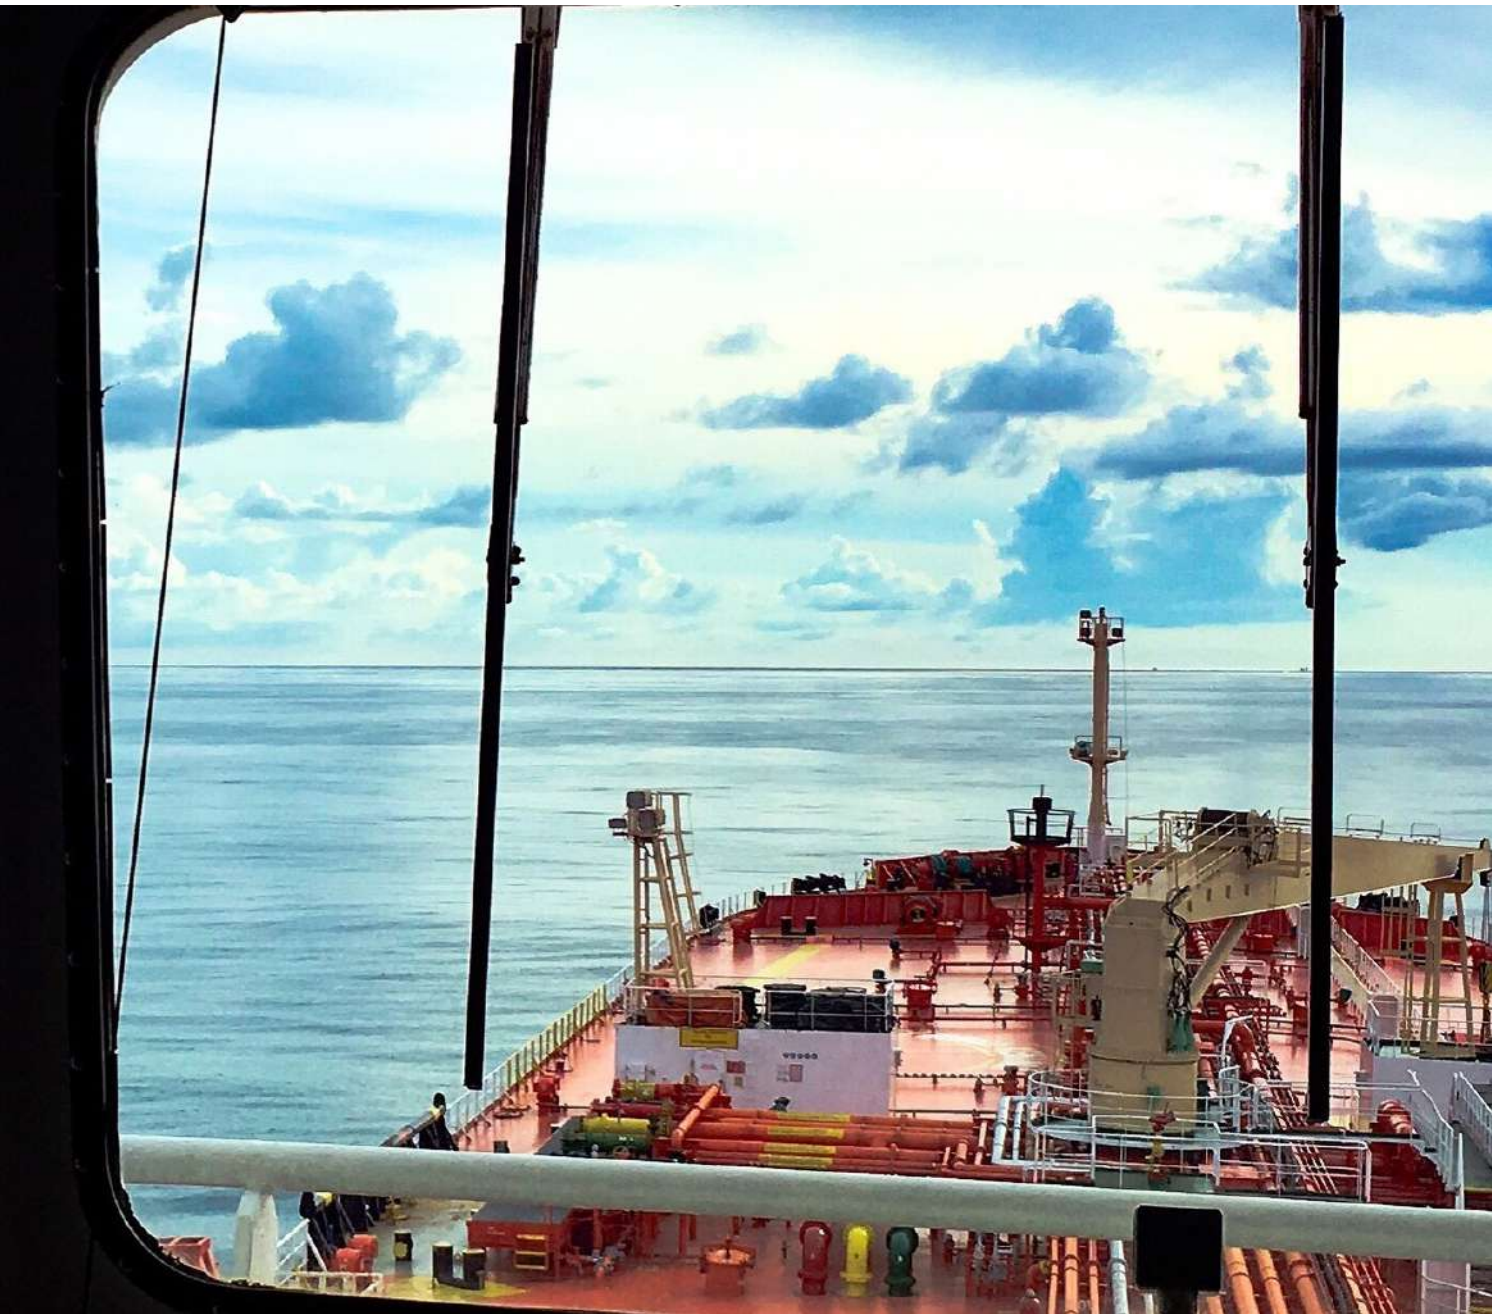

- Cost effective
- Keeps windows clean and dry
- Eliminates condensation
- Quick and easy installation
- Suitable for all windows
- Available by the roll, by the metre, or cut to size

WINDOW WIPERS

Maintain constant visibility in the harshest conditions with our wiper systems. Designed specifically for marine use and manufactured using durable Marine-tested materials, they're built to withstand the toughest of environments.

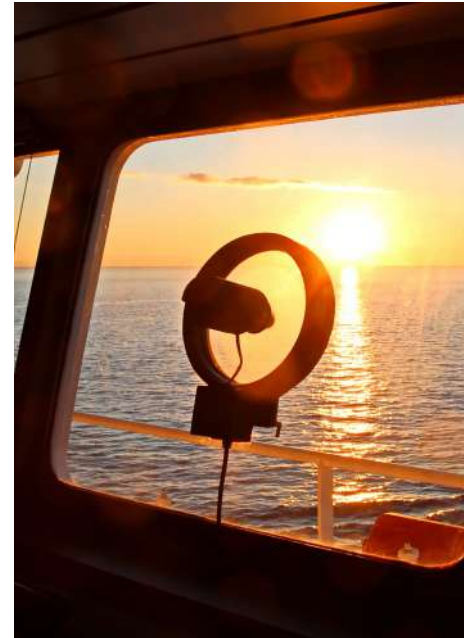

CLEARVIEW

The Clearview wiper helps to maintain constant visibility on deck in the harshest weather conditions. Unlike conventional wipers that allow rain, snow, and spray to return to the window between strokes, the Clearview's motor-driven toughened glass disc spins at speeds of up to 1,400rpm to provide unrestricted visibility.

Constructed with toughened glass and a water-tight sea resistant aluminium frame, the Clearview wiper is easily fitted within existing bridge windows. Once installed, the robust, durable design needs no maintenance. Supplied with built in heater and rocker switch for operation.

With 2 operating speeds, your crew can navigate safely no matter what conditions they're faced with.

- 100% visibility at all times
- Prevents fogging & condensation
- Works in the harshest environments
- 24V DC - Unit transformers available for other power units.
- Constructed from sea water resistant aluminium
- Suitable for all types of vessel, crane and oil rigs

	DOUBLE GLAZING
INPUT POWER SUPPLY	AC 220V/AC 110V/ DC 24V
INPUT POWER	≤ 80W
REVOLUTION SPEED	≥ 1400rpm
HEATING	Optional
HEATING POWER	≤ 250W
SHEEL MATERIAL	ZL - 104
PROTECTION GRADE	IPX6 Protection Grade
WALL THICKNESS	8 - 30mm

STRAIGHTLINE

In association with
scanwipers[®]

Maintain visibility in all climates and conditions with Straightline wipers designed exclusively for marine vessels and manufactured using marine grade aluminium and stainless steel.

We supply both electric and pneumatic wipers, powered by a low voltage as standard or optionally using an onboard air supply.

You can have confidence of safe operation and navigation when installing Straightline Wipers to your vessel. These wipers are a reliable, hardwearing solution for the harshest of environments.

ELECTRIC

- Designed to meet ISO/DIS 17899
- 24V DC Motor with quiet operation
- Angled configurations possible
- Variable wiper speed control
- Self parking as standard
- Heaters suitable for Arctic conditions to minus 25° C
- DNV Type Approved Product (Electric Only)

PNEUMATIC

- For use in hazardous areas
- For offshore & marine applications
- Certified for use in gas zone 1
- Atex conformity according to EN13463-1
- Atex II 2G c T5 X
- Working pressure 5-7 bar

	 SINGLE (XSLW & ISLW)	 TWIN (XSLW & ISLW)
OPTIONS	Electrical & Air Power	Electrical & Air Power
STROKE	min. 319 mm, max. 2262 mm	min. 612 mm, max. 4499 mm
BLADE	max. 1950 mm	max. 1200 mm
ARM	max. 1300 mm	max. 650 mm

PLACEMENT	Above, below and vertical	Above, below and vertical

PANTOGRAPH

In association with
scanwipers[®]

Maintain strong visibility in all weather conditions by installing Pantograph Wipers.

We supply both electric and pneumatic wipers, powered by a low voltage as standard or optionally using an onboard air supply.

Manufactured using the highest quality marine grade materials, Pantograph Wipers are reliable, durable, and easy to install.

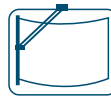

They also provide an ideal alternative when straight line wipers are not an option.

ELECTRIC

- Designed to meet ISO/DIS 17899
- 24V DC Motor
- Up to 100 wipe cycles per min, across the centre of the glass
- Can be applied to inclined & irregular shaped windows
- Fully sealed mechanism with lubricated bearings
- DNV Type Approved Product (Electric Only)

PNEUMATIC

- For use in hazardous areas
- For offshore & marine applications
- Certified for use in gas zone 1
- Atex conformity according to EN13463-1
- Atex II 2G c T6
- Working pressure 4 - 7 bars
- Blade Length up to 1750mm

PANTOGRAPH

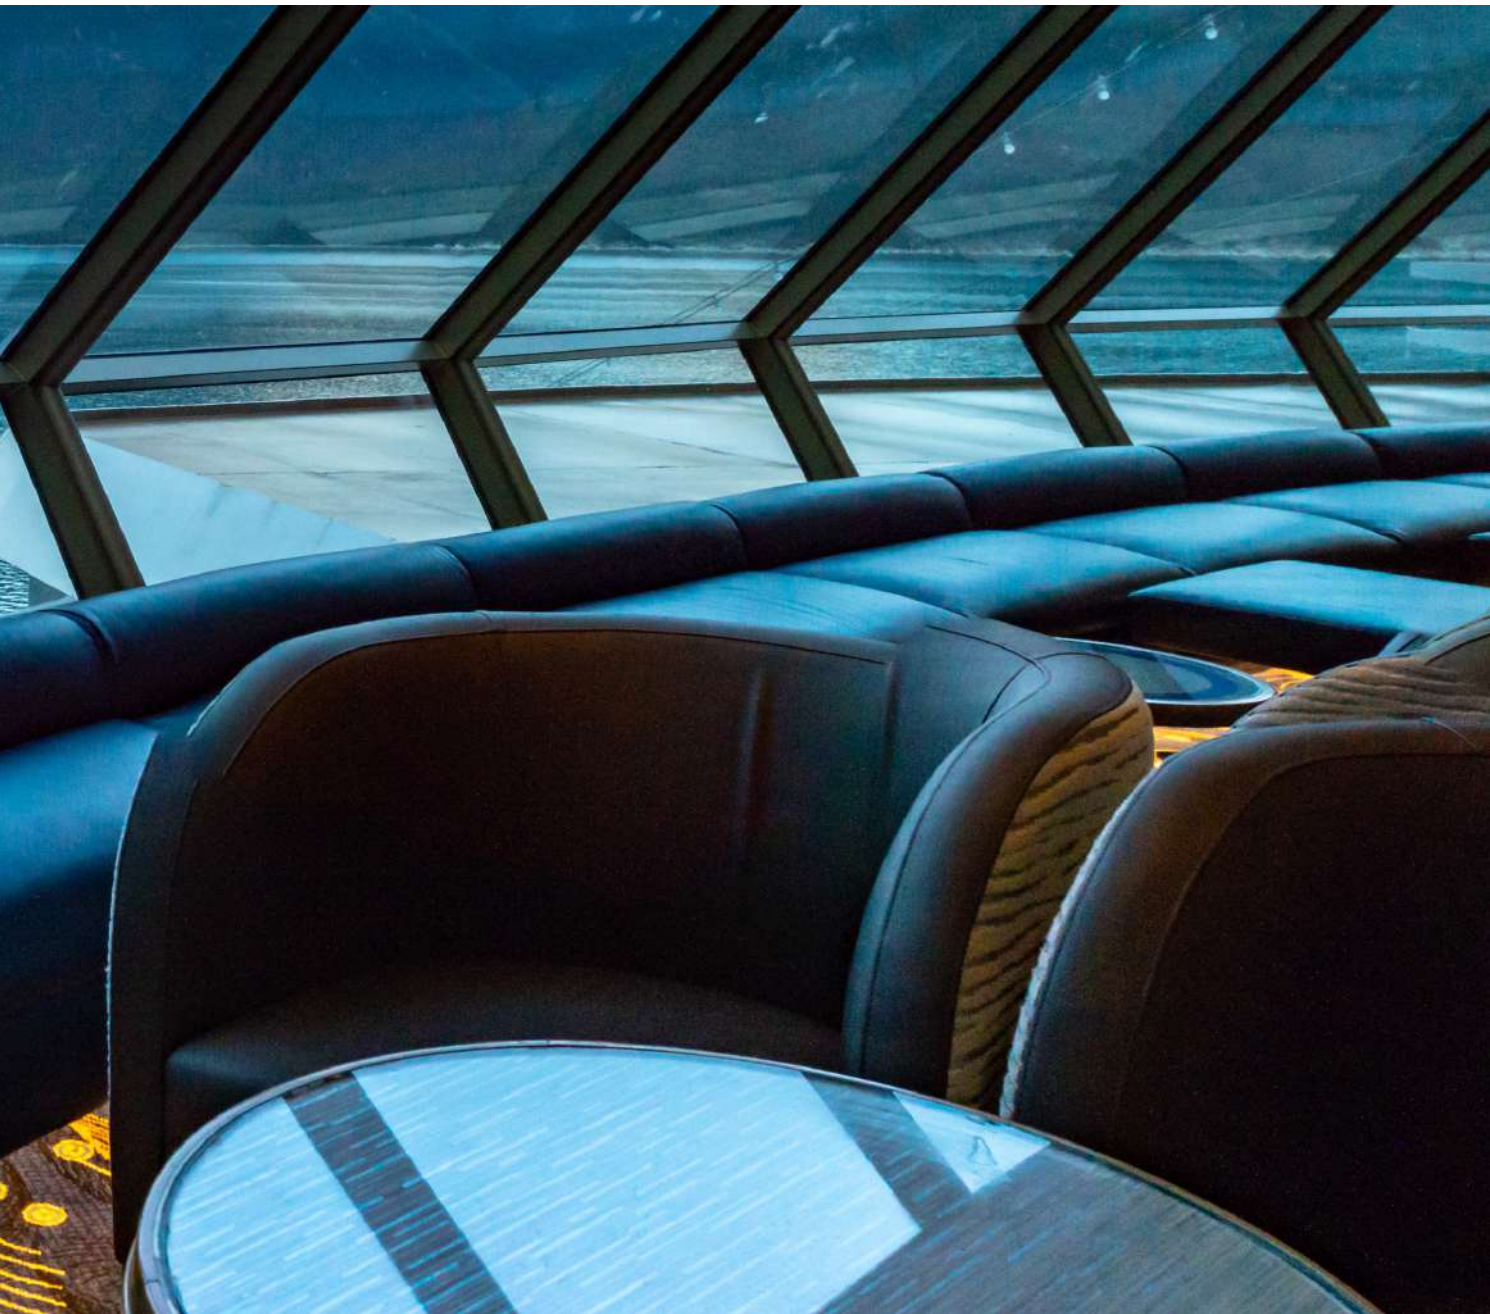

OPTIONS	Electrical & Air Power
WIPING ANGLES	35° - 90°
CENTRE DISTANCE	60mm
BULKHEAD THICKNESS	10, 20, 40, 75 mm
PARKING	End Optional
PLACEMENT	Above and below window

A large cruise ship is docked at a pier, viewed from the perspective of someone inside a boat's cabin. The ship is white with blue accents and has a prominent funnel. A long line of white trucks is parked along the pier, extending from the foreground towards the ship. The water is calm, and the background shows a forested hillside under a clear sky. The view is framed by the dark interior of the cabin, with a blue leather seat visible in the foreground.

SERVICES

From consultations and surveys, to delivery options that suit your build schedule, we provide a range of helpful services to save you time, money, and ensure you get the right solution to realise your vision.

SERVICES

CONSULTATION & SURVEYS

We'll visit your vessel at a time convenient to your project, offer recommendations and highlight potential issues so you can be confident you'll get the best solution. Receive a no-obligation quote within 48 hours of our visit, and if you need any samples, just ask and we'll provide these free of charge.

BESPOKE DRAWING SETS

For complex blinds and curtain projects which contain non-standard shaped windows, we will supply bespoke drawing sets with dimensions and the different options available for your windows, to provide you the right solution every time.

INSTALLATION SERVICES

When it comes to fitting window treatments, our fully-accredited expert installation team will work closely with you to ensure the job is completed on time with minimum disruption. Contact us to arrange an installation quote.

INSTALLATION GUIDES

Planning on using your own team to install our window treatments? We'll include detailed guides for each item purchased to help your installation process run smoothly.

SCHEDULED DELIVERIES

With a range of flexible delivery options, we make it easy for you to receive your order when and where you need it.

ACCOUNT MANAGERS

For larger or complex outfitting and retrofit projects, we provide a dedicated account manager to guide you through the full process from choosing the right window treatments through to installation. We'll be on hand every step of the way to make sure your project meets all your expectations.
