

# BRC

WELDED MESH SOLUTIONS

## THE COMPANY

Established in 1975 in the UK, BRC Manufacturing specialise in the manufacture of steel mesh for the Construction, Mining, Civil Engineering and Industrial markets.

For the industrial market BRC offer both Standard and Bespoke products. The company has a totally flexible approach to industrial mesh manufacture, thereby allowing a customer driven solution to be provided.

Based at its Barnsley site the company employ in excess of 100 staff. BRC Manufacturing is a division of the Acertec Investments Ltd group of companies, which also includes the nine regional BRC divisions & the Stadco Group.

## MODERN FACILITIES

Recent major investment in fully computerised and automated machinery has been made at the BRC Industrial Mesh production plant at our Barnsley site. The new equipment enables high quality/specification mesh panel production and allows both an improved product range and service to be offered to our customers, facilities include:

HIGH SPECIFICATION WELDING MACHINES

DESIGN TEAM USING AUTOCAD

Other machines on site include: Froma automated welding machines, shear, nibblers, wire cutters etc.

NEW MANUFACTURING BAY

## PROMPT SERVICE

BRC Manufacturing specialise in a totally flexible approach to the production of industrial mesh, allowing a customer driven solution to be offered. With the ability to manufacture 7 days a week 24 hours per day BRC offers a prompt and reliable service to ensure customer deadlines are met.

## HIGH QUALITY

ISO 9001 & CARES ACCREDITATION ACHIEVED.

BRC manufacture welded mesh from bright drawn mild steel wire to BS 4482, being electronically welded at every intersection.

As standard the mesh is supplied without further treatment, however a variety of finishes are available upon request.

## MODERN TESTING FACILITY

All BRC industrial mesh panels are subjected to testing in both wire and finished format.

The testing of cold reduced wire is carried out in accordance with the requirements of BS 4482. Welded mesh intersections are then randomly selected from finished panels and tested in accordance with BS 4483 section 13.2 with dimensional checks also being performed and recorded during production to comply with the requirements of BS EN ISO 9001:2000.

## EXTENSIVE PRODUCT RANGE

The Industrial Mesh Product Range Offered Includes:

- Standard or Bespoke welded mesh panels 2.5mm to 8mm wire diameter.
- Mesh Pitch Centres from 12mm on Cross Wire & 25mm on Line Wire.
- Infinitely Variable Centres on Line & Cross Wires.
- Line Wire Lengths up to 3 Metres.
- Cross Wire lengths from 100mm To 1650mm.
- Three Different Wire Diameters can be utilised Per Mesh Panel (1 x Line, 2 x Cross Wire).
- Framed Panels Available.
