

Engineered steel solutions

**PRODUCTS AND TECHNICAL ADVICE FOR THE
CONSTRUCTION AND ASSOCIATED INDUSTRIES**

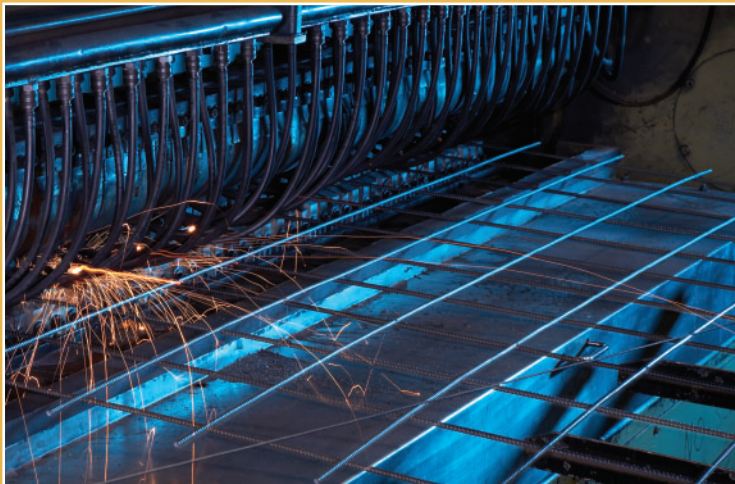

BRC Ltd is a leading manufacturer of engineered steel products with a long and successful history of serving the construction, mining and associated industries.

This experience, coupled with a focus on customer service that is at the heart of everything we do, has earned us an enviable reputation for technical expertise, product development and problem-solving.

Our products range from rebar and standard fabric - BRC is the UK's largest supplier of steel products for use in

concrete construction - through specialist products for applications such as custom-engineered formwork and bespoke industrial welded wire mesh.

Some customers come to us for straightforward product supply and our ability to meet the shortest of lead times; others benefit from a value added service by taking full advantage of the technical advice we can provide.

And frequently, what begins as consultancy develops into a partnering relationship which see us working together to develop intelligent solutions to real challenges, saving both time and money.

Specialist skills, progressive outlook

The BRC name has been synonymous with innovation, manufacturing flexibility and engineering expertise since the company was founded in 1908 and these qualities remain central to our operation today.

Each of the specialist companies that make up the group - BRC Reinforcement and BRC Manufacturing - offers unparalleled experience in its own particular area and retains the flexibility and autonomy to respond quickly to the changing needs of its customers.

On the other hand, the ability to cooperate as a group of engineering companies delivers real customer benefit through sharing of complementary skills, joint investment and the stability that comes with being part of a major organisation.

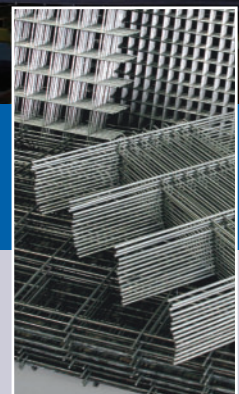

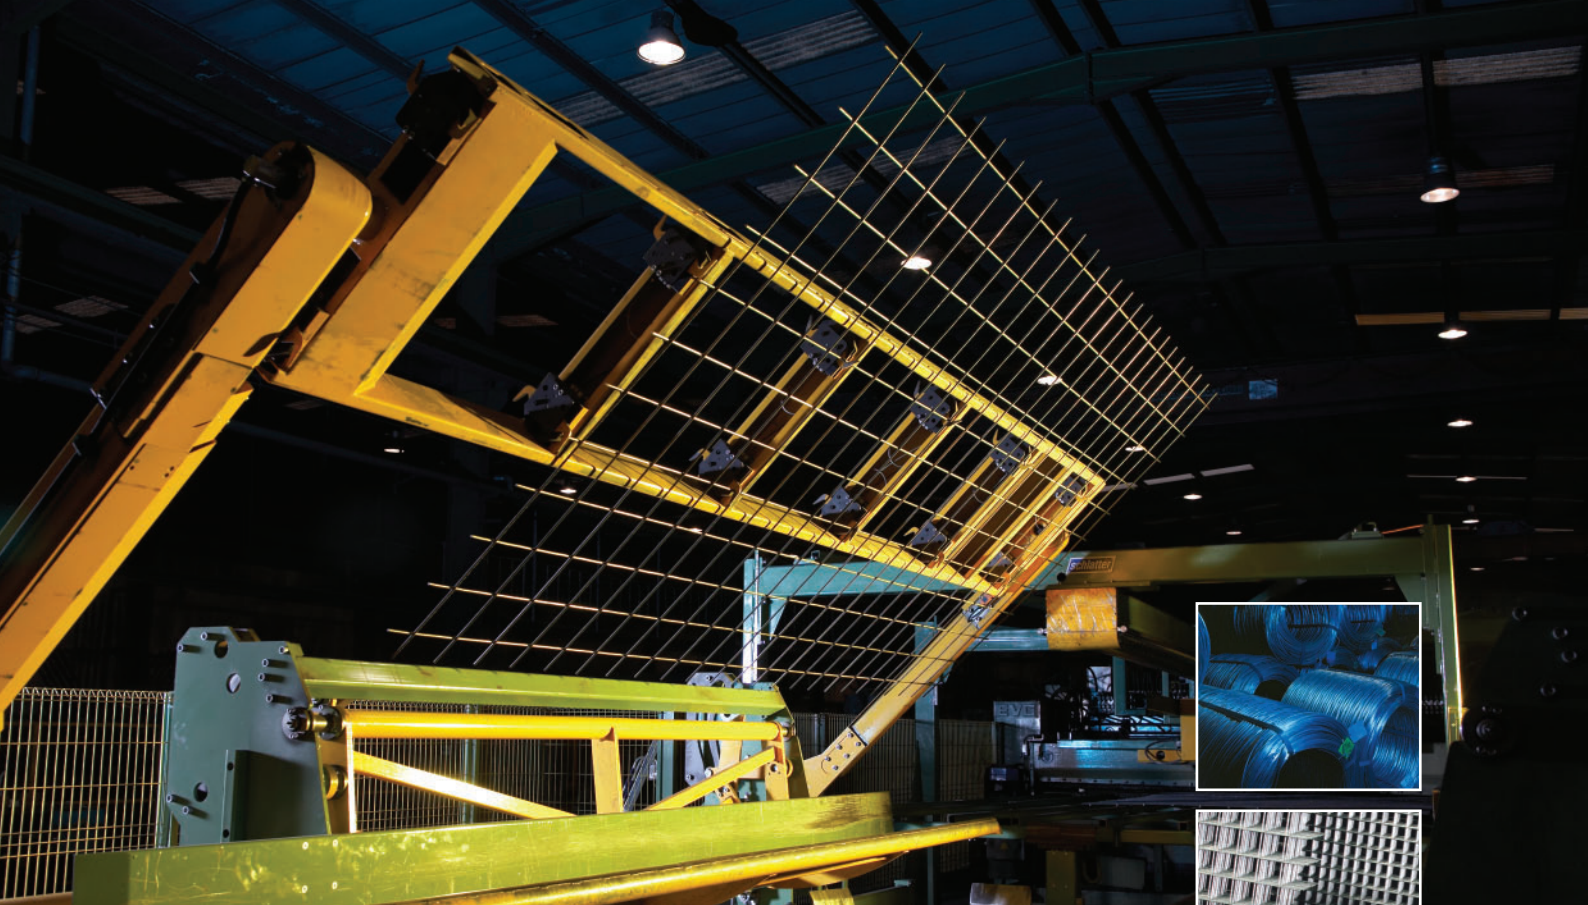

This brochure provides a brief introduction to the companies that make up BRC Ltd., and the concrete reinforcement and related products that we design, manufacture, market and distribute.

Between our companies, each of which holds a market-leading position in its own field, we have the skills, customer-focus and market understanding necessary to drive our business forward into the 21st century.

And in doing so, we will continue to be able to deliver the products and services that your company needs today and will look for tomorrow.

OUR SERVICE EXTENDS FROM STRAIGHTFORWARD PRODUCT SUPPLY TO IN-DEPTH CONSULTANCY THROUGH WHICH WE WORK TO DEVELOP INTELLIGENT SOLUTIONS TO REAL CHALLENGES, SAVING BOTH TIME AND MONEY.

Bespoke & standard welded wire mesh and accessories

BRC Manufacturing is based in modern manufacturing facilities and produces standard & bespoke welded steel mesh and wire supports for stockists and welded wire mesh for industrial customers.

In keeping with the principles of the group as a whole, BRC Manufacturing has benefited from significant investment in training, quality systems and the most up-to-date manufacturing processes.

As a result, we have the capacity to operate around the clock and satisfy medium or high volume orders, and the flexibility to meet lower volume orders when required. And we have the experience to ensure that every panel is produced accurately, cost-effectively and on time.

- **Construction mesh: standard fabric and specials**
- **Wire supports: continuous hychairs and circular type**
- **Industrial welded wire mesh**

Reinforcement solutions for the construction industry

BRC Reinforcement is the UK's largest supplier of steel reinforcement and associated products for concrete. With a nationwide network of manufacturing and sales locations we have a total commitment to customer service for all end users.

Our core product is steel reinforcement - from rebar and standard fabric to carpet reinforcement, custom engineered mesh and pre-fabricated reinforcement - and we have the capacity to supply any size of project, anywhere in the UK, within the tightest of lead times. We also offer innovative and market-leading products such as couplers, continuity strip and an extensive range of other essential products and accessories for concrete construction.

While straightforward product supply remains the foundation of our business, our 'Reinforcement Solutions' service is

being used by more and more customers to save time and money.

By getting together with customers earlier in the process and taking an intelligent, engineering-based approach to the detailing of steel reinforcement, we can help cut steel laying time, reduce manpower requirements and accelerate the construction programme.

- Contractor detailing service
- Bar and fabric products
- Custom engineered mesh
- Carpet and pre-fabricated reinforcement
- Reinforcement accessories

If you'd like to find out more about how either of our divisions might help you - maybe you've even got a project you'd like us to look at - just contact your nearest BRC office and we'll be happy to talk.
