

Type 3E and 4E

## Electric heating for «Büchi»-Reactors

Type 3E

Type 4E

for «ecoclave» up to 3 liter

for «polyclave» up to 5 liter

for «kiloclave» up to 20 liter

BÜCHI - THE WAY TO GET RESULTS!

Addtion to our well established vessels with double jacket

We extended our product range with Type 3E and Type 4E stirrer vessels with electric heating mantle for volumes of 0.5 to 20.0 liter depending on the choice of reactor system.

- Temperature up to 350°C for maximum efficiency
- Insulation for safe handling
- Integrated cooling coil for accurate and fast control
- Bottom valve for draining without disassembling of vessel
- Vessel with bolt-on or quick action closure
- Electric heating is permanently attached on vessel for optimal heat transfer and temperature stability
- Programmable cascade PID controller, remote control from PC
- Predefined control parameters for various vessel sizes

#### Cascade temperature controller «btc»

|                                    |                              |
|------------------------------------|------------------------------|
| <u>Operating temperature</u>       | -100...400°C                 |
| <u>Over-temperature protection</u> | variable 0...420°C           |
| <u>Temperature control</u>         | ICC – selftuning             |
| <u>Temperature stability</u>       | 0.01 +/- K                   |
| <u>Display resolution</u>          | 0.01°C                       |
| <u>Integrated programmer</u>       | for temperature profiles     |
| <u>Heating capacity</u>            | 3000 W                       |
| <u>Digital interface</u>           | RS232 / RS485                |
| <u>Mains power</u>                 | 230V, 50 / 60 Hz             |
| <u>Classification</u>              | DIN 12876-1, IEC 61010-2-010 |
| <u>Dimensions</u>                  | 210 x 180 x 180mm            |
