

# Büchi Magnetic Drives

## Absolutely tight, safe and dependable

bmd 075 / bmd 300 / bmd 800 / bmd 1200 / bmd 1800 / bmd 3600 / bmd 5400  
cyclone 075 / cyclone 300

- Büchi quality
- well designed
- safe and reliable
- PED / ATEX
- corrosion resistant
- easy maintenance
- compact design

**Application**  
Leak-free stirring  
system for pressure  
reactors

BÜCHI – THE WAY TO GET RESULTS!

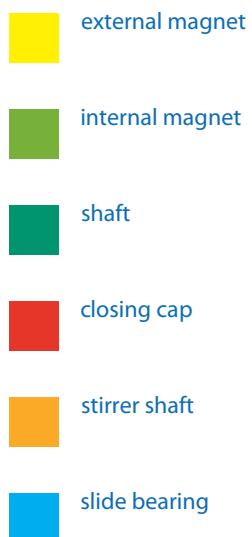

compact design

reliable operation

easy handling

little maintenance

safe reactions

## How a «bmd» magnetic drive works

The main difference between a magnetic drive and conventional drives such as rubber glands, lip seals or mechanical seals is the non-contact driven stirrer shaft. The external magnet and the internal magnet are virtually connected through the strong magnetic field. The external magnet is located outside the pressure chamber. The internal magnet inside the pressure chamber is mounted to the stirrer shaft and rotates simultaneously with the motor driven external magnet.

## Standard range bmd 075 to bmd 1200

For technical details of the standard range of «bmd 075» to «bmd 1200» and «cyclone 075» / «cyclone 300» refer to the table on reverse side.

ATEX-version optional

## yclone 075 / cyclone 300 – Magnetic couplings with integrated stirrer motor

The «cyclone 075 / 300» is equipped with an electric motor, which is combined with a magnetic coupling «bmd 075 / 300» into a hermetically sealed unit. The controller allows for stepless adjustment of the agitator speed. The controller is equipped with a remote control input for external speed adjustment.

### practical, simple, compact

The drive is installed on the cover plate with an M36x1.5 thread. No additional fixtures are required.

## bmd 1800 to bmd 5400 for pilot scale

For technical details of «bmd 1800» to «bmd 5400» refer to the table on reverse side.

ATEX standard

bmd 1800

bmd 3600

bmd 5400

The reliable and pressure tight alternative to conventional mechanical seals.

Designed for heavy duty operation in industrial applications

Maintenance-free due to employment of ceramic ball bearings

# Applications

bmd 1800 on 100 liter Hastelloy reactor

cyclone 300 on versoclave

cyclone 075 on Büchi ecoclave

bmd 1800 on 80 liter hydrogenation reactor

bmd 800 on custom kiloclave

bmd 300 with ATEX drive on polyclave

bmd 300 with ATEX drive on polyclave
